Delta Strength and Capability

TECHNOLOGY & TECHNICAL SERVICE

Since 1981, Delta has been producing reliable, quality consistent, dependable EMI filters that cater to power supplies, monitors, instruments, networking and medical equipments, and many other devices around the world. Our extensive years of experience have made us the prime leader of these product. We have flexible engineering and supporting groups that enable us to provide solutions to our customer's problems in a timely manner. And with our very own international recognized test facilities such as shielding rooms and anechoic chamber, test for total EMC compatibility can be done and certified right away. Our technical expertise is demonstrated by over 1000 standard part numbers that are approved with UL, CSA and VDE.

EMI/RFI Shielding Room

QUALITY

Delta's commitment to quality can be summed up in the numerous awards we have received from major world-class leaders such as Dell, HP, IBM, NEC, Sony, Fujitsu, Intel, GE and many others. All our EMI/RFI Filters meet international safety standards and have undergone Statistical Process Control and Total Quality Control before mass production. Our full commitment in quality starts from the design stage and continues through the production stages. All Delta plants are certified with ISO-9000/ISO-14001 and our EMI/RFI filter plant has been qualified under the IECQ system.

MANUFACTURING

Delta's manufacturing base for EMI/RFI filters is located within all our ISO-14001 certified Thailand plants. State-of-the-art automation equipments have been installed in these plants and through this, we are able to greatly increase our production capacity and maintain a consistent quality level for our products. Our automation equipment includes automated winding, assembly and test systems. All these systems are developed and produced by our own automated engineering department. To assure our clients of a continuous supply of stock all year round, our global operation with sales and marketing are located in key cities around the world.

Manufacturing Plant in Thailand

Marketing and R&D in Taoyuan, Taiwan

Automated Assembly Line

PRODUCT OFFERING

Delta has been moving forward with continual product improvement. Our three-phase filters with maximum amperes of 600A and voltage rating of up to 520 VAC are presently in mass production, and have been used to a large extent in AC motor drives and machine tool applications. In the meantime, development of high frequency products for telecom & networking market are underway.

Our present products covers IEC inlet filters with a maximum of 20A, chassis mounting filters with maximum of 60A and the three-phase filters. Thanks to our long experience working with multi-national companies, we have the capability to deliver customized products within a short period of time, whatever the quantity is. Our facilities, experience, services, compounded with the latest technology are there to offer EMI filters to meet our customers' utmost satisfaction.

FEATURES AND BENEFITS FOR OEM USERS

1. UL, CSA, VDE/ TUV, SEV, SEMKO, DEMKO AND SETI Safety Standards

All Delta filters are designed to meet UL standard 1283, CSA STANDARDS C22.2 No.0, No.8, and VDE STANDARD EN60939-2, including conformity to temperature range (-25°C to +100°C) and full current rating usage at both 115 VAC and 250 VAC. All filters in this catalog are UL recognized and CSA certified, and over 1000 types are VDE approved under the following file numbers:

UL file no. E79109

CSA file no. LR48852C

VDE file no. 11641-4730 or SEMKO.

2. FCC and VDE Emission Compliance

Delta offers a wide range of filter characteristics, both in standard and custom form, to help you meet all applicable FCC, VDE and VCCI conducted emission standards, including FCC, VDE and VCCI class B requirements.

3. Construction and Design

- ① - Toroid cover for perfect insulation, with built-in spacers to maintain creepage distance between windings.
- ② - Precision balance of inductance between windings to prevent core saturation at full load.
- ③ - Only capacitors that comply with VDE 0565-1 are used.
- ④ - Low leakage current.
- ⑤ - Both crimped and soldered connections.
- ⑥ - Anti-rotation terminals to prevent open connections.
- ⑦ - Corrosion-proof case.

4. Quality Control

- 100% tested for Hipot, leakage current and insertion loss.
- Less than 200 parts-per-million (ppm) defect rate.
- Approved for Ship-to-Stock program (no incoming inspection) at major computer manufacturers' facilities.

5. Availability

Stock of standard items are maintained in Northern California for immediate shipment to OEM customers and at distributors located throughout North America.

6. Price

Delta filters are very competitively priced due to highly automated lines and cost-saving designs.

7. Custom Design and Testing Services

Delta has engineering labs and shield rooms in Taipei and Northern California. These facilities allow us to design and fabricate custom filters to meet special requirements not met by standard filters and to test customers' equipment for compliance to FCC, VDE and VCCI conducted emission requirements.

BRIEF CONCEPT OF EMI FILTER

◆ EMI NOISE-ORIGIN AND CHARACTERISTICS

Recent decades have witnessed the rapid growth of computers, business machines, industrial controls, medical electronic equipment and many other devices that utilize digital techniques. Concurrent with this growth, the problems of Electro-Magnetic Interference (EMI) found both in the equipment, causing equipment malfunction, and outside of the equipment, causing interference to other equipment of related Emission communication, have become more severe. The frequency ranges of EMI noise are 10KHz to 30MHz by conduction through wires and 30MHz to 1GHz by radiation.

Conducted EMI noise consists of two modes:

1. Common mode interference is EMI noise present on the line and neutral referenced to safety ground. Most noise problems are caused by common mode interference.
2. Differential mode interference is EMI noise present on the phase line referenced to the neutral. Differential mode EMI tends to decline rapidly in the building wiring.

◆ VDE

Products intended for European markets should meet the requirements devised by VDE. VDE 0243 specification limits conducted emission for computing devices and other industrial, scientific and medical equipment to two levels:

Class A:

The user has to apply for a special operating license issued by the BZT (the German equivalent of FCC). If the equipments moved from one location to another, the BZT must be notified.

Class B:

If the equipment meets the B level, it then has general approval and no operating license is required. Most manufacturers attempt to meet Class B for marketing reasons. Conducted EMI regulated by FCC part 15 and VDE 243 are shown in the figure below.

◆ LEGAL REGULATION ON CONDUCTED EMI FCC

In the US, the FCC has imposed legal regulations to control interference at its source. All computing devices, including peripherals, using digital techniques with a clock frequency greater than 10KHz must comply with FCC regulations part 15 after Oct. 1983.

The FCC had divided products into two basic categories:

Class A:

For computing devices marketed for use in a commercial, industrial or business environment. Class A requires verification, which means that the equipment has been tested and complies with the data.

Class B:

For computing devices marketed for use in a residential environment. Class B requires certification, which means that the test data has to be submitted to FCC for the equipment to pass.

◆ ADEQUATE SELECTION OF EMI FILTER

The effectiveness of noise attenuation is undoubtedly the primary concern for selecting an EMI filter. The capability in this aspect usually refers to the reading of insertion loss which is derived from following formula:

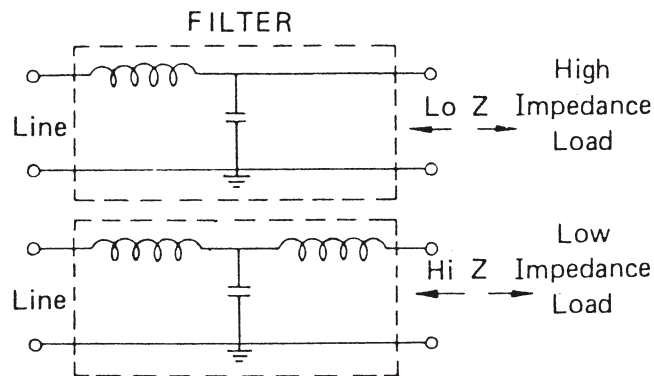

$$\text{Insertion loss (dB)} = 20 \log \frac{V_1}{V_2}$$

Wherein V_1 = EMI voltage without filter

V_2 = EMI voltage with filter

Published insertion loss data assumes that power line and load have the same impedance and all such data are in practice generated from a 50 OHM-50 OHM circuit. However, the said condition seldom exists in actual application. Therefore, insertion loss readings are not supposed to represent actual performance of noise suppression but a reference for comparison among different units or evaluation of product conformity in incoming inspection. To verify actual effectiveness in noise suppression, a filter has to be mounted in the equipment and be subjected to conduct emission test in a shielding room.

The effectiveness of noise attenuation depends heavily on the source and load impedance. EMI filter function as "mismatching networks" between source and load impedance at high frequencies. The greater the mismatch, the more effective the filter will be in attenuating the interference. In most cases, the power line presents low impedance. The filter line side should then present high impedance. Equipment, on the other hand, can be either high or low impedance. High impedance equipment such as linear power supplies should use a filter with low impedance or a shunt capacitor at the load side to create a mismatch. Low impedance equipment such as switching power supplies, synchronous motors or shunt regulators should use a filter with high impedance at the load side and should have a series inductor. The schematics below provide you an easy way for choosing the appropriate filter.

The following factors should also be taken into consideration in your selection process.

- a. Current and voltage rating
- b. Environment requirement such as temperature, shock, vibration and humidity
- c. Physical dimension and terminal configuration
- d. Availability
- e. Cost effectiveness
- f. Safety approval

DELTA PARTS NUMBERING SYSTEM

MODELS OTHER THAN POWER ENTRY MODULE TYPES AND P.C. BOARD MOUNTING TYPES

<u>03</u>	<u>GE</u>	<u>E</u>	<u>G3</u>	<u>V</u>	<u>-R</u>
					Option resistor Design sequence: (for cylinder types, the 8th digit designates the outside diameter; S- \varnothing 38mm; M- \varnothing 43mm; L- \varnothing 50mm)
					Input/Output connection: G = lugs; W = PVC wires; S = screws G5 = 5 lugs (6.3*0.8mm) W5 = 5 wires (UL 1015 AWG#18, 4" long)
					Case style: A- Small mounting ears 90 degrees from terminal sides B- Triangle mounting ears 90 degrees from terminal sides C- Triangle mounting ears on terminal sides D- IEC connector with mounting screws E- IEC connector package F- Cylinder types G- Two-hole mounting bars, 90 degrees from terminal sides N- IEC connector with snap-in type
Series: Electrical circuit, see specific catalog pages					
Current rating: AC rms e.g.: 03 amp					

POWER ENTRY MODULE TYPES

<u>06</u>	<u>AR</u>	<u>2</u>	<u>D</u>		
					Special design: A- with ground choke D- with double pole power switch for models AB, AK, AR series
					Module construction: 1- IEC connector & fuse holder 2- IEC connector, fuse holder and power switch 3- IEC connector, fuse holder, power switch and voltage selector switch 4- IEC connector, fuse holder & voltage selector switch 5- For models other than CK, CR series; same construction as 4 but with voltage selector switch at front panel
Series: Electric circuit, see specific catalog pages					
Current rating: AC rms e.g.: 06 amp					

PCB MOUNTING TYPES

<u>03</u>	<u>ME</u>	<u>3</u>	<u>A</u>	<u>-R</u>	
					Option resistor Special design: A: with ground choke Design sequence
Series: Electrical circuit, see specific catalog page					
Current rating: AC rms e.g. :03 amp					

DELTA PARTS NUMBERING SYSTEM

3-Phase Types

10

Current rating: AC rms
e.g.: 10 amp

TD

Series:
 TD: used in "Δ" system
 TDH: used in "Δ" system
 TDR: used in "Δ" system, vertical style
 TDV: used in "Δ" system, vertical style
 TDS: used in "Δ" system, screw style
 TY: used in both "Δ" & "y" system
 TYS: used in "Δ" & "y" system, screw style
 TYT: used in "Δ" & "y" system terminal block style
 PT: P.C.B. Filter
 PY: P.C.B. Filter

S6

Input/Output connection :
 G = lugs; W = PVC wires; S = screws; T = terminal blocks
 e.g.
 G6 = 6 lugs
 W6 = 6 wires
 T2: 2 terminal blocks
 TIW4: 1 terminal block / 4 wires

D

Special Design:
 Dual: diff. and common choke

15A DE SERIES

COMPACT IEC CONNECTOR FILTERS

INTRODUCTIONS

- 15DEEG3X: Filter with 120°C temperature socket
- 15DEEG3X(D): Filter with 65°C temperature socket
- Safety Approval:
 EG3HA/(D): UL, CSA,

GE SERIES

HIGH PERFORMANCE IEC CONNECTOR FILTERS

INTRODUCTIONS

1. A high performance general purpose filter with an IEC connector providing effective EMI suppression.
2. Bleeder resistor can be added with suffix "-R" on part numbers, except "G3H", "G3V", "W3V", "G3J", "W3J", types.
3. All part numbers are UL recognized, CAS certified and VDE approved.
4. With optional Y-Cap from 100pF to 3300pF.
5. Safety under apply for 03/06/10GEEG3U series.

◆ **Proposal of installation for ME3 series please follow these steps to install:**

1. Insert filter to PCB and soldering.
2. Screw panel and filter on PCB.
3. Assemble case with PCB with panel and filter.

Note: - Socket of filter should be assembled with mounting hole of case tightly for easy insertion of power cord.
 - Screw from the outside of case to fix filter for more secured assembly (optional).

IEC INLET PC BOARD MOUNTING FILTERS

INTRODUCTIONS

1. Power module incorporates an IEC connector, a fuse holder with optional power on/off switch and voltage selector switch, plus an EMI filter all-in-one single, easy-to-install unit.
2. Fuse holder designed for one IEC 5x20mm fuse. Safety interlock prevents fuse removal with line plug inserted (Use only with 250V fuse).
3. All part numbers are UL recognized, CSA certified and VDE approved.

SPECIFICATIONS

1. Maximum leakage current each line-to-ground @ 115VAC 60Hz: 0.25mA @ 250VAC 50Hz: 0.45mA
2. Hipot rating (one minute) line-to-ground: 2250VDC line-to-line: 1450VDC
3. Operating frequency: 50/60Hz
4. Rated voltage: 115/250VAC

INTRODUCTIONS

1. Designed as a general purpose filter with a switch effective EMI suppression for both common and differential mode noise.
2. With optional resistor and 3300pF/1000pF
3. Bleeder resistor is added with suffix "-R".
4. Switch electrical lifetime : 10,000 cycles.
Maximum inrush current : 50A.

POWER ENTRY MODULE EMI FILTERS

INTRODUCTIONS

1. Power module incorporates an IEC connector, single or double-fuse (IEC 5 x 20mm or 3AG 6.3 x32mm) holder, optional voltage selector switch and double-pole power switch, plus an EMI filter all-in-one easy-to-install unit.
2. Adapts to 110-120V or 220-240V input voltage by simply reversing the fuse cartridge.
3. All part numbers are UL recognized, CSA certified and VDE approved.

SPECIFICATIONS

1. Maximum leakage current each line-to-ground @ 115VAC 60Hz: 0.25mA @ 250VAC 50Hz: 0.45mA
2. Hipot rating (one minute) line-to-ground: 2250VDC line-to-line: 1450VDC

GENERAL PURPOSE TWO-STAGE FILTERS

UNIT: $\frac{\text{INCH}}{\text{mm}}$

INTRODUCTIONS

1. Two-stage filters provide high performance in suppressing both line-to-line and line-to-ground noise.
2. All part numbers are UL recognized, CSA certified and VDE approved.

MEDICAL FILTERS

IEC CONNECTORS SCREW MOUNTING

INTRODUCTIONS

1. Designed to meet globally accepted IEC publication 320 Class 1, that allows users to comply with industry standard in power entry requirement.
2. Connector for cold condition, with pin temperature 70°C max.
3. Nickel-plated brass pins and soldering terminals.
4. Screw-on mount from front or rear (with screw type-M3).
5. Fuse holder designed for one fuse and one spare fuse (both 5x20mm fuses). Safety interlock prevents fuse removal with line plug inserted.
6. Adapts to 110V or 240V input voltage simply by reversing the voltage selector.
7. All part numbers are UL recognized, CSA certified except for SK-015A which is UL listed.
 SK-1000 are DEMKO, approved.
 SK-1017 is UL, CSA approved.
 SK-1008 UL, CSA, VDE, CCC approved.
 SK-1007A UL, CSA approved.
 SK-1007A is patented for new construction (R.O.C. patent no. 54606).
 SK-015A is UL, CSA, VDE, Somko, CCC. Approved

SPECIFICATIONS

1. Rated voltage: 250VAC
2. Minimum insulation resistance at 500VDC: 10M OHM
3. Dielectric strength (one minute): 2000VAC between pins
4. Flammability class: UL 94V-0

3. Nickel-plated brass pins and soldering terminals.
4. Snap-in mount (panel thickness: 0.04 inch to 0.07 inch).
5. Power module in plastic or metal case that incorporates an IEC connector, fuse holder, power switch and voltage selector switch, all-in-one easy-to-install unit.
Part numbers 06A1, 06A2, 06A2D and 06A5 are power modules in plastic case; part numbers 06AN2, 06AN2D, 06AN3, 06AN3D and 06AN5 are power modules in metal case.
6. Fuse holder designed for one fuse. Safety interlock prevents fuse removal with line plug inserted.
7. Adapts to 110V or 220V input voltage with voltage selector switch.
8. Compact design and high volume production provide maximum flexibility and significant savings in space and cost over assembly of individual components.
9. All part numbers are UL recognized, CSA certified and SEMKO approved.

SPECIFICATIONS

1. Rated voltage: 115VAC/250VAC
2. Maximum leakage current each line-to-ground
2uA AT 115VAC/60Hz
5uA AT 250VAC/50Hz
3. Dielectric strength (one minute)
line-to-ground: 2250VDC
line-to-line: 1450VDC
4. Flammability class: UL 94V-0
