### PRODUCT OVERVIEW

086-SBSMR+ Series Hand-Flex™ coaxial cables are ideal for interconnecting coaxial components and sub-assemblies in a wide range of systems, including communications, military and aerospace, environmental and test chamber systems and more. The hand-formable cable provides a minimum bend radius of 6mm to accommodate tight layouts without the need for bending tools, adapters or brackets. SMA right angle to SMA bulkhead connectors make these cables ideal for perpendicular connections run directly to the front panel of rack-mounted equipment. The connectors feature an anti-torque nut to prevent cable stress during installation and an insulated outer jacket to minimize signal leakage. They are available in a range of lengths to meet a variety of connection requirements.

### KEY FEATURES

Feature	Advantages
Hand-Formable RF Cables	Facilitates the assembly of coaxial systems and sub-systems without the need for special cable-bending tools or adapters. Reduces the risk of damage during bending
Tight Bend Radius	6mm bend-radius makes the cable ideal for connections in tight spaces and crowded layouts
18 GHz Right-Angle SMA connector	Meets requirements of 90°connections without bending and without sacrificing high-frequency performance
18 GHz SMA Bulkhead connector	Ideal for making secure connections directly through equipment chassis panels
Excellent Return loss	Suitable for interconnecting a variety of RF components while minimizing VSWR ripple contribution
Good Power Handling Capability: <ul style="list-style-type: none"> <li>• 211W at 0.5 GHz</li> <li>• 35W at 18 GHz</li> </ul>	Supports medium to high RF power levels used in transmit paths.
Anti-torque nut	Reduces risk of twist damage to cable during installation
