## Performance

Dielectric Strength 1000Vrms  
 Recommended Minimum Heat Sink Maximum watts dissipated by solenoid are based on an unrestricted flow of air at 20°C, with solenoid mounted on the equivalent of an aluminum plate measuring 3" square by 1/8"  
 Class B Insulation System

<sup>1</sup> Continuously pulsed at stated watts and duty cycle  
<sup>2</sup> All values shown are average at 20°C  
<sup>3</sup> Other voltages available (please consult factory)  
<sup>4</sup> Reference number of turns

RoHS Compliant
