Issue 1

Datasheet

DESCRIPTION

Honeywell has over 30 years' experience designing and delivering accurate and reliable proximity sensors that are currently used in a variety of military and commercial aircraft. Honeywell's patented IHM Series Aerospace Proximity Sensors are configurable, non-contact, hermetically sealed devices designed to sense the presence or absence of a target in harsh-duty aircraft applications. The IHM Series provides on/ off output, and can be configured with an optional health monitoring output to the host system. The technology Honeywell uses in the IHM Series is considered an improvement on traditional ECKO (Eddy Current Killed Oscillator) topology that previously had been the standard in aerospace applications. The IHM Series helps to reduce downtime and maintenance costs due to a unique circuit that can detect any internal failures and display a fault output instead of a false positive or false negative.

VALUE TO CUSTOMERS

- Enhanced vibration and EMI specifications help to increase revenue (flight hours) and reduce cost to serve (system maintenance)
- Hermetic sealing helps increase revenue (flight hours), reduce cost to serve (maintenance), & reduce cost of goods (spares)
- Platform approach helps to increase revenue (speed to market) and reduce cost to serve (lower engineering investment)
- Health monitoring helps to increase revenue (flight hours), reduce cost to serve (maintenance), and reduce cost of goods (spares)
- Supplier stability helps to reduce cost to serve (troubleshoot with original supplier)
- Current install base helps to reduce cost to serve (proven performance and MTBF)

FEATURES

- Industry-leading indirect lightning and dielectric ruggedness: Meets the increased requirements of today's composite aircraft and most challenging applications including landing gear, thrust reversers, and flight controls
- Superior vibration ruggedness: Capable of withstanding extremely high vibration applications
- Environmentally rugged: Fully hermetic packages provide long-term reliability in very harsh environments by eliminating the potential for contamination of the sensor from the application environment. In addition, Honeywell has developed an innovative method to hermetically seal wirelead (pigtail) configurations
- Integral Health Monitoring Capability: Optional third output state to indicate the health of the sensor (whether it is healthy or failed). Reduces maintenance time, reduces delayed flights, and lowers overall maintenance cost across the life of the aircraft
- Non-contact design: Utilizes non-contact technology to sense the presence or absence of a target regardless of the dirty, harsh environment in which it is placed, eliminating mechanical failure mechanisms, reducing wear, minimizing downtime, increasing durability, and increasing reliability

POTENTIAL APPLICATIONS

- Thrust reverser actuation system (TRAS) (stowed or deployed status)
- Doors (open/closed position, locked status)
- Cargo loading latch detection (palet locked)
- Evacuation slide door-lock mechanism
- Flight controls (flap/slat, spoilers)
- Landing gear (uplock, downlock, & Weight On Wheels (WOW))

DIFFERENTIATION

- Diagnostic capability: Integral Health Monitoring: sinks 9 mA ±1 mA or <1 mA on fault detection
- Honeywell has developed an innovative method to hermetically seal wire-lead (pigtail) configurations
- Fire detection/integrity: Explosion proof RTCA/DO-160G Section 9, Cat E&H
- Operational shock: RTCA/DO-160G Section 7, Cat B
- Crash safety: RTCA/DO-160G Section 7, Cat B
- Radio frequency emission: RTCA/DO-160G Section 21, Cat M
- Lightning induced transient susceptibility: RTCA/DO-160G Section 22, Cat B3K3L3

PORTFOLIO

Honeywell's IHM Series is part of a comprehensive line of aerospace sensors, switches, and value-added solutions. To view Honeywell's complete product offering, click here.

Table 1. Performance Specifications

Characteristic	Parameter		
Mechanical Characteristics			
Weight	60 g to 150 g		
Sealing	Hermetically sealed		
Connector/leads	 D38999/25YA98PN D38999/25YA98PA EN2997Y10803MN M83723/90Y1005N M83723/90Y10056 M83723/90Y10057 M83723/90Y10058 Pigtail 		
Form factor	 Inline, cylindrical, threaded Right angle, cylindrical, threaded Inline, cylindrical, flanged Right angle, cylindrical, flanged 		
Sensing distance	5 mm max.		
Sensing face	Inconel®		
Outer body material	Stainless steel		
Sensor head diameter	13,5 mm [0.53 in]		
Sensor length	various; 60 mm [2.36 in] max.		
MTBF	>1,000,000 flight hours		
Electrical Characteristics			
Supply voltage	12 Vdc to 28 Vdc		
Supply current	<10 mA		
Operating temperature range	-55 °C to 115 °C [-67 °F to 239 °F]		
Storage temperature range	-65 °C to 115 °C [-85 °F to 239 °F]		
Output type	Current sinking output	Open collector output, Normally Closed	Open collector output, Normally Open
Target far	Output current: 12 mA to 16 mA	Switch closed Max. load current: 250 mA res. Output voltage drop: less than 2 V at 250 mA resisitve load current	Switch open Max. leakage current: 50 μA @ 28 Vdc
Target near	Output current: 4 mA to 6 mA	Switch open Max. leakage current: 50 μA @ 28 Vdc	Switch closed Max. load current: 250 mA res. Output voltage drop: less than 2 V at 250 mA resisitve load current
Internal failure	Output current: <1 mA or 9 mA to 11 mA	n/a	n/a
Target response time	5 ms		
Power on delay time	<1 second		
Bonding resistance	<2.5 mΩ		
Dielectric strength	1500 Vdc and 1500 Vac		
Insulation resistance	200 m Ω min. at 50 Vdc		
Sensing Characteristics			
Ga/Gd	see Figure 2		
Target material	17-4 PH stainless steel heat treated to condition H1025		
Target dimension	Rectangular target of 25 mm x 18 mm x 3 mm		

Characteristic	Parameter	
Environmental Characteristics		
Temperature and altitude	RTCA/DO-160G – Section 4, Category D3	
Temperature variation	RTCA/DO-160G – Section 5, Category S2	
Humidity	RTCA/DO-160G – Section 6, Category C	
Operational shock and crash safety	RTCA/DO-160G – Section 7, Category B	
Vibration	RTCA/DO-160G – Section 8, Category R (Curve E & E1)	
Explosion safety	RTCA/DO-160G – Section 9, Category E&H ENV III	
Water proofness	RTCA/DO-160G – Section 10, Category R	
Fluid susceptibility	RTCA/DO-160G – Section 11, Category F	
Sand and dust	RTCA/DO-160G – Section 12, Category D	
Fungus resistance	RTCA/DO-160G – Section 13, Category F	
Salt spray	RTCA/DO-160G – Section 14, Category T	
Magnetic effects	RTCA/DO-160G – Section 15, Category A	
Power input	RTCA/DO-160G – Section 16, Category A	
Voltage spike	RTCA/DO-160G – Section 17, Category A	
Audio frequency conducted susceptibility	RTCA/DO-160G – Section 18, Category Z	
Induced signal susceptibility	RTCA/DO-160G – Section 19, Category CWE	
Radio frequency radiated susceptibility	RTCA/DO-160G – Section 20, Category G	
Radio frequency conducted susceptibility	RTCA/DO-160G – Section 20, Category Y	
Radio frequency emission	RTCA/DO-160G – Section 21, Category M	
Lightning induced transient susceptibility	RTCA/DO-160G – Section 22, Category B3K3L3	
Icing	RTCA/DO-160G – Section 24, Category A	
Electrostatic discharge	RTCA/DO-160G – Section 25, Category A
