

Rabbit® 3000

Low EMI, High Performance Microprocessor

High-performance, low-EMI microprocessor designed specifically for embedded control, communications and Ethernet connectivity.

Overview

The Rabbit 3000 runs up to 55 MHz with compact code and direct software support for 1 MB of code/data space. Typically operating at 3.3 V (with 5 V tolerant I/O), the Rabbit 3000 boasts 6 serial ports with IrDA, 56+ digital I/O, quadrature decoder, PWM outputs, and pulse capture and measurement capabilities.

This high performance microprocessor also features a battery-backable real-time clock, glueless memory, I/O interfacing and ultra-low power modes. Four levels of interrupt priority allow fast response to real-time events. Its compact instruction set and high clock speeds give the Rabbit 3000 exceptionally fast math, logic and I/O performance.

Our Dynamic C® development environment provides an integrated C compiler with debugger and linker for efficient and powerful applications development.
