

E-T-A Thermal-Magnetic Circuit Breaker 2210-T2..

Description

One, two and three pole thermal-magnetic circuit breakers with trip-free mechanism and toggle actuation (S-type TM CBE to EN 60934/IEC 934). Featuring a combi-foot design for both symmetric and asymmetric rail mounting. Available with auxiliary contact (1 x N/O or 1 x N/C) for status signalling. Two and three pole models are internally linked to ensure that both/all poles trip in the event of an overload on one pole, even if the actuator is held in the ON position. This CBE can be supplied in current ratings up to 32 A with a choice of characteristic curves. All screw terminals are recessed for safety. Approved to CBE standard EN 60934 (IEC 60934).

Typical applications

Process control equipment, robotics, machine tool control, communications systems, instrumentation.

Features

- Comprehensive approvals allow global use
- Current rating range from 0.1 A to 32 A
- Very small width of only 12.5 mm including auxiliary contacts
- High vibration resistance to DNV GL Class B for mounting with combustion engines, pumps, compressors
- Compliant with the relevant requirements of the railway standards DIN EN 50155, DIN EN 61373 and EN 45545 (detailed information upon request)

2210-T2..
2-pole

Your benefits

- Space and weight savings of at least 50 % compared to conventional MCBs
- Reduced assembly times thanks to integral auxiliary contacts
- Optimum equipment protection through fine grading of current ratings

Preferred types – for more details on all configurations please see order numbering code

Preferred types are E-T-A products most frequently used by E-T-A customers. We manufacture E-T-A preferred types in particularly high

volumes. Our preferred types are supplied at shorter lead times than non-standard versions.

Preferred types	Standard current ratings (A)

Ordering information

Type No.	
2210	single and multipole thermal-magnetic circuit breaker
Mounting	
T	rail mounting
Actuator design	
2	toggle
Number of poles	
1	single pole protected
2	2-pole protected
3	3-pole protected
Accessories	
0	without accessories
Terminal design (main contacts)	
K0	screw terminals
Characteristic curve	
F1	fast acting: therm. 1.01-1.4xI _N ; magn. 2-4xI _N DC (DC only)
F2	fast acting: therm. 1.01-1.4xI _N ; magn. 3,5-6,5xI _N AC/4,5-8,5xI _N DC
M1	standard delay: therm. 1.01-1.4xI _N ; magn. 6-12xI _N AC, 7,8-15,6xI _N DC
T1	delayed: therm. 1.01-1.4xI _N ; magn. 10-20xI _N AC
Auxiliary contact design	
H	without intermediate position
Auxiliary contacts	
1	with auxiliary contacts
2	auxiliary contacts on pole 1 only (multipole devices)
Auxiliary contact function (see diagrams)	
2	1 N/O contact
3	1 N/C contact
Auxiliary contact - terminal design

Installation drawing

This is a metric design and millimeter dimensions take precedence ($\frac{\text{mm}}{\text{inch}}$)

Typical time/current characteristics

- - - +60 °C ——— +23 °C - - - -30 °C
 +140 °F +73.4 °F -22 °F

¹⁾Magnetic tripping currents are increased by 30% on DC supplies.

1

Typical time/current characteristics

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section Technical information.

Ambient temp.	-22 °F -30 °C	-4 °F -20 °C	+14 °F -10 °C	+32 °F 0 °C	+73.4 °F +23 °C	+86 °F +30 °C	+104 °F +40 °C	+122 °F +50 °C	+140 °F +60 °C
Derating factor	0.76	0.79	0.83	0.88	1	1.04	1.11	1.19	1.29

Multi pole devices: all poles symmetrically loaded. With single pole overload, thermal tripping will be at max. $1.7 \times I_N$ with curves F1, F2 and M1.

¹⁾ Magnetic tripping currents are increased by 30 % on DC supplies (curves F2, M1).
