

MODEL 3038 ACCELEROMETER

Excellent durability with hermetic seal Easy installation with SMD design Over-range protection for up to 10,000 g shock loads Long-term measurement stability

Designed for application durability in extreme temperature, vibration and shock environments, TE Connectivity's (TE) Model 3038 accelerometer delivers the performance you need.

The Model 3038 helps improve sensing confidence and allows for simple installation with a hermetically sealed SMD design. It incorporates a gasdamped piezoresistive MEMS sensing element providing outstanding long-term stability. With a millivolt output signal and mechanical overload stops that provide shock protection to loads greater than 10,000g, this sensor offers excellent value for performance.
