

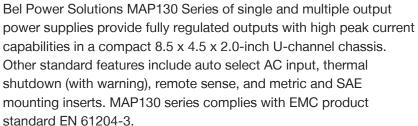

# MAP130 Series AC-DC Power Supplies

This convection-cooled series is designed for use in industrial environments in temperatures up to 50°C.

All products are approved to the latest international regulatory standards and RoHS compliant models display the CE Mark.

# **Key Features & Benefits**

- Automatic 110/230 V Input Voltage Selection
- All Outputs Fully Regulated
- Remote Sense
- Overvoltage Protection and Overtemperature Protection
- Power Fail Signal Included
- Greater than 100,000 Hour MTBF
- U-Channel Chassis: 8.5 x 4.5 x 2.0 inch (215.9 x 114.3 x 50.8 mm)
- Optional Cover
- Metric and SAE Mounting Inserts
- RoHS Compliant
- CE Marked to Low Voltage Directive
- Meets EMC Standards: EN 61204-3

EN 55032 EN 61000-3-3

#### 1. SINGLE-OUTPUT MODEL SELECTION

Model numbers highlighted in yellow are EOL / Obsolete

<sup>&</sup>lt;sup>1</sup> Peak load for 60 seconds or less are acceptable, 10% duty cycle, maximum.

<sup>&</sup>lt;sup>2</sup> Typical peak to peak noise expressed as a percentage of output voltage, 20 MHz bandwidth.

MAP130-1012 output currents are expressed as 12 V / 15 V operation. MAP130-1024 output currents are expressed as 24 V / 28 V operation.

Peak loads up to 165 Watts, (total of all outputs), for 60 seconds or less are acceptable, (10% duty cycle max.).

<sup>&</sup>lt;sup>5</sup> Maximum peak to peak noise expressed as a percentage of output voltage, 20 MHz bandwidth.

<sup>&</sup>lt;sup>6</sup> Non-G models use lead solder, therefore are not recommended for applications in scope of RoHS.

#### 3. INPUT SPECIFICATIONS

| PARAMETER            | CONDITIONS / DESCRIPTION                                       |                         | MIN       | NOM        | MAX        | UNITS |
