

## Description

Single or multipole hydraulic-magnetic circuit breakers with trip-free mechanism and toggle actuation. A choice of switching characteristics ensures suitability for a wide range of applications. Industry standard dimensions and panel mounting. Auxiliary contacts optional. Low temperature sensitivity at rated load. Approved to CBE standard EN 60934 (IEC 60934) S-type HM CBE.

**US patent number:** US 7,532,095 B2

## Typical applications

In the business fields Communication and Transport: power supplies, switchgear, instrumentation and process control engineering.

## Standard current ratings and typical internal resistance values

| Current rating (A) | Trip curves and internal resistance ( $\Omega$ ) per pole |         |            |            |
|--------------------|---|---------|------------|------------|
|                    | F1  | F2      | K1, M1, T1 | K2, M2, T2 |
| 0,05               | ---   | ---     | 531        | 542        |

8345 - C 0 1 A - U 3 M1 - D B1 B1 B - 60 A ordering example

Please be informed that we have minimum ordering quantities to be observed.

Remote trip coil available to special order.

\*) Other characteristic curves upon request (e.g. pulse delayed, for high inrush currents or capacitive loads)

**Note:**  
Move actuator of multipole devices slowly and smoothly into ON position to ensure reliable latch-on behaviour of all poles.

| X8345 - S 01 K W1 02 M ordering example |  |

Please be informed that we have minimum ordering quantities to be observed.

Remote trip coil available to special order.

\*) Other characteristic curves upon request (e.g. pulse delayed, for high inrush currents or capacitive loads)

**Dimensions**

**Mounting version B/C**

Flange mounting rectangular aperture

number of poles 1 to 4

mounting thread M3 or 6-32  
all dimensions referred to the top edge  
mounting depth 4.2 mm/.165 in.  
max. insertion depth 5.5 mm  
max. tightening torque 0.33 Nm

**Cut-out dimensions:**

1-pole

multipole

**Mounting version F**

Flange mounting round aperture

number of poles 1 to 4

mounting thread M3 or 6-32  
all dimensions referred to the top edge  
mounting depth 4.2 mm/.165 in.  
max. insertion depth 5.5 mm  
max. tightening torque 0.33 Nm

**Cut-out dimensions:**

1-pole

4-pole

max. panel thickness: 3 mm

**Installation drawing**

**Terminal design / Dimensions**

**P - with blade terminals**

blade terminal A6.3-0.8 (QC .250) DIN 46244

**R - round connectors**  
D = 6 mm

**W - laminated round terminals**

**U/V stud terminals with auxiliary contacts**

auxiliary contact module (change over)

tightening torque:  
10-32 UNF. M5 max. 2 Nm  
1/4-20 UNC. M6 max. 3 Nm

**Internal connection diagrams**

**1-pole protected magnetically**

**1-pole protected hydraulic-magnetically**

**multipole**

This is a metric design and millimeter dimensions take precedence ( $\frac{mm}{inch}$ )

All dimensions without tolerances are for reference only. In the interest of improved design, performance and cost effectiveness the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

Typical time/current characteristics at +23 °C / +73.4 °F

**Curve F1 (instantaneous) for DC**

**Curve F2 (instantaneous) for AC**

**Curve K1 (short delay) for DC**

**Curve K2 (short delay) for AC 50/60 Hz**

**Curve M1 (medium delay) for DC**

**Curve M2 (medium delay) for AC 50/60 Hz**

**Curve T1 (long delay) for DC**

**Curve T2 (long delay) for AC 50/60 Hz**

**N.B.** All curves will only be maintained if the escutcheon is mounted on a vertical surface. Ambient temperature or mounting side-by-side does not influence the trip curve, derating is not required. The breakers may trip in the event of current peaks < 0.003 sec. For these applications we offer a mechanical pulse delay – please enquire.  
**Other characteristic curves upon request (e.g. pulse delayed, for high inrush currents or capacitive loads).**

**Actuator configuration**

**A 1 toggle per pole, mounting version B/C**

**Shock directions**

**Description**

A module which adds remote trip capability to all versions of type 8345. A voltage applied across the coil, by means of an external sensor for example, will cause disconnection of the main switch/circuit breaker mechanism.

**Typical applications**

Electrical monitoring of safety systems, remote trip.

**Description**

The X8345-R is an additional module which provides remotely controlled ON and OFF functionality for the E-T-A series 8345 magnetic circuit breaker range. The module actuator, which is motor driven, is factory fitted adjacent to the circuit breaker(s) which it is controlling. The module can be operated by a suitable external changeover switch, momentary switches (one ON, one OFF). The status of the actuator will follow the position of the external switch, i.e. if the circuit breaker trips electrically or is operated manually, the actuator will not change. A single module will control a single pole breaker or multipole circuit breakers up to 3 poles. In the application it has to be ensured that the supply voltage is maintained at all times. When switching the circuit breaker OFF manually the module has also to be switched off by means of the changeover switch before switching the breaker on again. The same is true for normal switch-on of the breaker.

US patent number: US 7,532,095 B2

**X8345-R**

**Internal connection diagrams**

single pole, hydraulic-magnetic protection, with remote ON/OFF actuation (operated by changeover switch)

single pole, hydraulic-magnetic protection, with remote ON/OFF actuation (actuated by two momentary switches)

**Typical applications**

Remote circuit breaker control (ON/OFF) for communication systems, marine installations, automation equipment and similar requirements.

**Caution:**

During actuation of the remote control, free travel of the toggle must be ensured.
