## Cascadable Amplifier 10 to 500 MHz

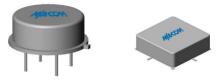

#### Features

- High Reverse Isolation: 22 dB
- High Output Power: 18 dBm

#### Description

The A180 RF amplifier is a discrete hybrid design, which uses thin film manufacturing processes for accurate performance and high reliability. This single stage bipolar transistor feedback amplifier design displays impressive performance over a broadband frequency range. An active DC biasing network insures temperature-stable performance.

Both TO-8 and surface mount packages are hermetically sealed, and MIL-STD-883 environmental screening is available.
