

# SMT Power Transformer

For Linear Technology  
LT1725 Flyback Controller

The A9967-AL surface mount transformer works with with Linear Technology LT1725 Isolated Flyback Controller. It is ideal for use in telecommunications isolated converters and isolated power supplies, and can be used in PoE applications.

This low-profile transformer is designed for an input voltage of 36 – 72 Volts. It features six 1-to-1 windings and 500 Vrms, one minute isolation between windings.

For the LT1725, 48 V to 15 V converter, three windings are connected in series for the primary and two windings are connected in parallel for the secondary output of 15 V, 2 A. The remaining winding provides power to the chipset.

Coilcraft can also custom engineer a transformer to meet your specific requirements. For free evaluation samples, contact Coilcraft or visit [www.coilcraft.com](http://www.coilcraft.com).

Part number <sup>1</sup>	Inductance at 0A <sup>2</sup> ±10% (µH)	Inductance at I <sub>pk</sub> <sup>3</sup> min (µH)	DCR max <sup>4</sup> (Ohms)	Leakage inductance <sup>5</sup> max (µH)	I <sub>pk</sub> <sup>3</sup> (A)	Output <sup>6</sup>
A9967-AL_	10.0	9.0	0.045	0.200	2.3	15 V, 2 A

1. When ordering, please specify **packaging** code:

#### A9967-ALD

**Packaging:** D = 13" machine-ready reel. EIA-481 embossed plastic tape (175 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge).

B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.

2. Inductance is per winding of the primary, measured at 100 kHz, 0.1 Vrms, 0 Adc. Inductance of the primary, with three windings connected in series is 90 µH.

3. Peak primary current (with three windings connected in series) drawn at minimum input voltage. Peak current per winding is 7.0 A.

4. DCR is per winding.

5. Leakage inductance is for one winding and is measured with all other windings shorted.

6. Output is with both windings of the secondary connected in parallel.

7. Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.

Parts manufactured prior to December 2011 may be marked differently.

Dimensions are in inches/mm

**Core material** Ferrite

**Weight:** 11.9 g

**Terminations** RoHS tin-silver over tin over nickel over phos bronze. Other terminations available at additional cost.

**Ambient temperature** -40°C to +125°C

**Storage temperature** Component: -40°C to +125°C.

Tape and reel packaging: -40°C to +80°C

**Resistance to soldering heat** Max three 40 second reflows at

+260°C, parts cooled to room temperature between cycles

**Moisture Sensitivity Level (MSL)** 1 (unlimited floor life at <30°C / 85% relative humidity)

**Packaging** 175 per 13" reel Plastic tape: 44 mm wide, 0.4 mm thick, 28 mm pocket spacing, 12.0 mm pocket depth

**PCB washing** Tested to MIL-STD-202 Method 215 plus an additional aqueous wash. See [Doc787\\_PCB\\_Washing.pdf](#).

Primary windings to be connected in series on the PC board. Secondary winding to be connected in parallel on the PC board.
