ACPL-K70A/K73A

Low Input Current, High Current Gain, LVTTL, LVCMOS Optocoupler

Description

These high gain series couplers use a light-emitting diode (LED) and an integrated high gain photodetector to provide an extremely high current transfer ratio between input and output. Separate pins for photodiode and output stage result in LVTTL-compatible saturation voltages and high-speed operation. Where desired, the V_{CC} and V_O terminals may be tied together to achieve conventional photo-darlington operation. A base access terminal allows a gain bandwidth adjustment to be made.

These optocouplers are for use in LVTTL/LVCMOS or other low-power applications.

The ACPL-K70A and ACPL-K73A are surface-mount devices that are packaged in an industry-standard stretched SOIC-8 footprint.

The stretched SOIC-8 does not require through holes in a PCB.

Table 1: Truth Table

LED	Output
ON	L
OFF	H

A 0.1-µF bypass capacitor must be connected between pins V_{CC} and GND.

Features

- 3.3V/5V dual supply voltages
- Low power consumption
- High current transfer ratio
- Low input current requirements: 0.04 mA
- Stretched SO8 package
- LVTTL/LVCMOS compatible output
- Guaranteed performance within the temperature range –40°C to +105°C
- Base access allows gain bandwidth adjustment
- High output current: 60 mA
- Worldwide Safety Approval:
  - UL1577 recognized: 5000 V_{rms}/1 min
  - CSA approval
  - IEC 60747-5-5 approval for reinforced insulation

Applications

- EIA RS-232C/low input current line receiver
- Low power systems: ground isolation
- Line voltage status indicator; low input power dissipation

CAUTION! Take normal static precautions in handling and assembling this component to prevent damage and/or degradation that may be induced by ESD. The components featured in this data sheet are not to be used in military or aerospace applications or environments.

Ordering Information

ACPL-K70A/K73A is UL recognized with 5000 V_{rms} for 1 minute per UL 1577.

Part Number	Option RoHS Compliant	Package	Surface Mount	Tape & Reel	UL 1577	IEC 60747-5-5	Quantity
ACPL-K70A/K73A	-000E	Stretched SO8	X		X		80 per tube
	-060E		X		X	X	80 per tube
	-500E		X	X	X		1000 per reel
	-560E		X	X	X	X	1000 per reel

To form an order entry, choose a part number from the Part Number column and combine with the desired option from the Option column.

Solder Reflow Profile

Recommended reflow condition as per JEDEC standard J-STD-020 (latest revision). Non-halide flux should be used.

Regulatory Information

The ACPL-K70A/K73A is pending approval by the following organizations:

- **UL** – Approval under UL 1577, component recognition program up to V_{ISO} = 5000 V_{RMS} File E55361.
- **CSA** – Approval under CSA Component Acceptance Notice #5, File CA 88324.
- **IEC 60747-5-5**

1. Common transient immunity in a Logic High level is the maximum tolerable (positive) dV_{CM}/dt on the rising edge of the common mode pulse, V_{CM}, to ensure that the output will remain in a Logic High state (that is, V_O > 2.0V).
2. Common mode transient immunity in a Logic Low level is the maximum tolerable (negative) dV_{CM}/dt on the falling edge of the common mode pulse signal, V_{CM} to ensure that the output will remain in a Logic Low state (that is, V_O < 0.8V).
