

ARX-WRL

Wireless APC-220 & Bluetooth Compatible Kit

ASURO with BT3

WRL Capabilities:

Read and transfer data to and from a PC or Android phone

Cruise around via Android phone control

Overview:

This very complete “wireless” radio set enables you to install an APC-220 or a Bluetooth compatible module on the ASURO or AAR Arduino robots. With this module you can not only communicate via an infrared link with your robot but also via RF waves. The advantage of RF high frequency waves is that the transmitter and the receiver do not need to be in visual contact. Learn all about wireless communication with this wireless kit.
