

## MKR ETH SHIELD

Are you developing a project for an environment where wireless connections are unavailable or would be inefficient? The MKR ETH shield allows to have a wired Ethernet connection between your MKR board and your network or the Internet. This is particularly useful for devices located where either electromagnetic noise is a problem or there are special safety requirements.

### GENERAL

Input Voltage	5 V
Controller	Wiznet W5500
Interface	SPI
Power Consumption	130 mA
Weight	15.3 g
Product Code	ASX00006
