

Bluegiga Solution Manager™

Bluegiga Solution Manager (BSM) is a web-based remote management and monitoring platform for Bluegiga Access Servers. By using BSM, you can simultaneously upgrade, monitor and configure a large number of Bluegiga Access Servers, instead of configuring each device one-by-one.

Key Features

- ▶ Provides remote management of Bluegiga Access Server groups
- ▶ Enables managing the *Bluetooth®* marketing applications (ObexSender)
- ▶ Simple graphical user interface
- ▶ Can be used over LAN, GPRS, or any other Internet connection type
- ▶ Communicates by using secure, encrypted network protocols
- ▶ Enables remote upgrades of Bluegiga Access Server software and content
- ▶ Available APIs enable complete look and feel customization
- ▶ User permissions can be tailored to provide different levels of user accounts

Description

Bluegiga Solution Manager makes it possible to manage deployments of Bluegiga Access Servers from a single point by a heterogeneous group of administrators and users. BSM also enables content management for the Bluegiga ObexSender application - targeted for *Bluetooth* Marketing solutions.

BSM is designed for companies looking for a ready-made management tool, and companies that need a customizable platform for tailoring the user interfaces and re-branding the system. BSM is available as a hosted service or as a CD-ROM delivery for customers that install the system on their own server hardware. In addition, the price of the system is reasonable.

Technical Details

- System components:
 - Management client software runs on Access Servers
 - Management server software runs on a Linux server hardware
 - Web browser user interface
- Light-weight management protocol supports command execution, configuration and file transfer tasks
- All management traffic is securely tunneled through a single TCP connection between the managed Access Server and the management server
- Management connection can always be open or only when scheduled (GPRS price optimization)
- Supports all Access Server www set-up options
- Management actions can be scheduled
- Supports remote software upgrades
- Built-in support for application and system log replication to the management server

System Requirements

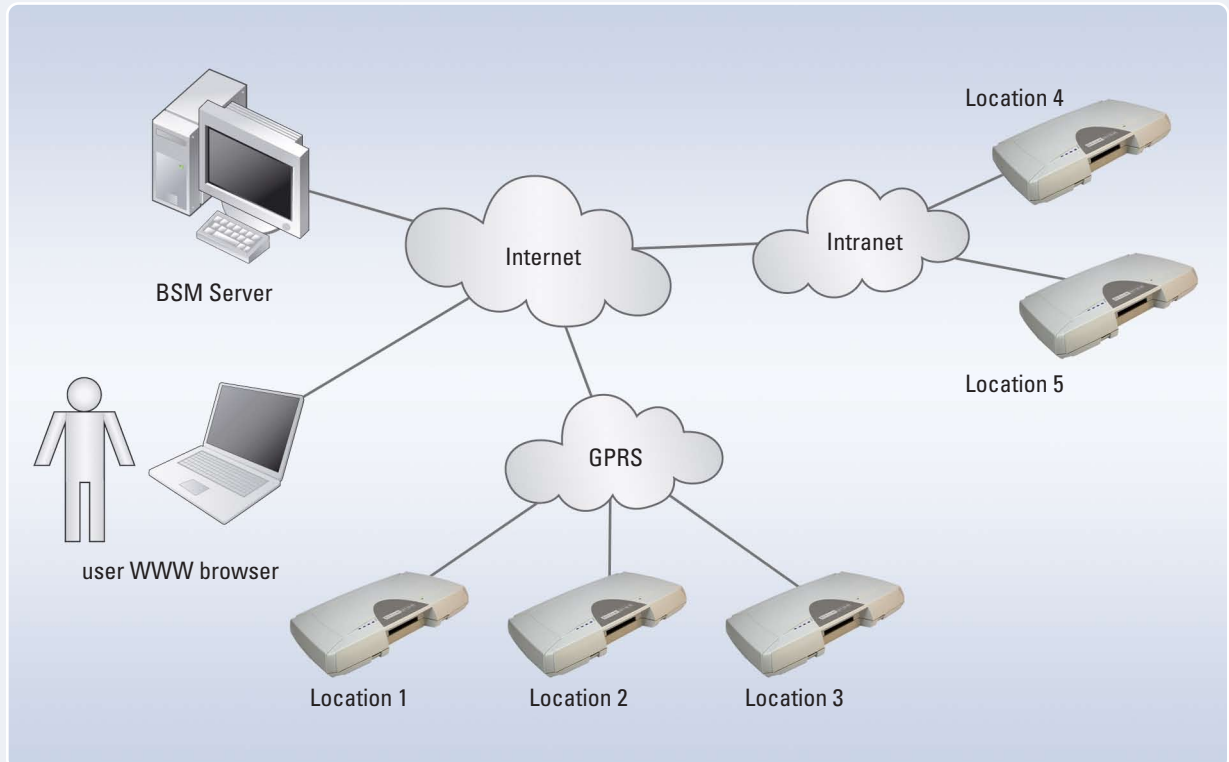

- Bluegiga Access Server software version 3.2 or newer
- RHEL4 binary compatible Linux server
- Any WWW browser
