**Features**

**Description**

The BGA855N6 is a front-end low noise amplifier for GPS L5 and L2, Galileo E5a, E5b, E6, Glonass G3, G2 and Beidou B3 and B2 bands for a frequency range from 1164 MHz to 1300 MHz. The LNA provides 17.8 dB gain and 0.60 dB noise figure at a current consumption of 4.8 mA in the application configuration described in [Chapter 4](#). The BGA855N6 is based upon Infineon Technologies' B9HF Silicon Germanium technology. It operates from 1.1 V to 3.3 V supply voltage (device optimized for 1.8V operation / also prepared to support 1.2V and 2.8V operation). OFF-state can be enabled by PON pin.
