

12 A Snubberless™, logic level and standard triacs

Features

- Medium current triac
- Low thermal resistance with clip bonding
- Low thermal resistance insulation ceramic for insulated BTA
- High commutation (4Q) or very high commutation (3Q) capability
- BTA series UL1557 certified (File ref: 81734)
- Packages are RoHS (2002/95/EC) compliant

Applications

ON/OFF or phase angle function in applications such as static relays, light dimmers and appliance motors speed controllers.

The snubberless versions (BTA/BTB...W and T12 series) are especially recommended for use on inductive loads, because of their high commutation performances. The BTA series provides an insulated tab (rated at 2500 V RMS).

Description

Available either in through-hole or surface-mount packages, the **BTA12**, **BTB12** and **T12xx** triac series is suitable for general purpose mains power AC switching.

Order code

See [Ordering information on page 11](#)

Table 1. Device summary

Symbol	Parameter	T12xx	BTA12 (1)	BTB12
$I_T(\text{RMS})$	RMS on-state current	12	12	12
$V_{\text{DRM}}/V_{\text{RRM}}$	Repetitive peak off-state voltage	600/800	600/800	600/800
I_{GT} (Snubberless)	Triggering gate current	10/35/50	5/10/35/50	5/10/35/50
I_{GT} (Standard)	Triggering gate current	-	35/50	35/50

1. Insulated

3 Packaging information

- Epoxy meets UL94, V0

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
