### General Description

The Supertex CL25 is a high voltage, temperature compensated, constant current source. The device is trimmed to provide a constant current of 25mA $\pm$ 10% at an input voltage of 5.0 - 90V. No external components are required. The device can be used as a two terminal constant current source or constant current sink.

A typical application for the CL25 is to drive LEDs with a constant current of 25mA. Multiple CL2s can also be used in parallel to provide higher currents such as 50mA, 75mA or 100mA. The device is available in TO-92 and TO-243AA (SOT-89) packaging.

## Absolute Maximum Ratings

Parameter	Value
Operating voltage, $V_{A-B}$	100V
Operating junction temperature, $T_J$	-40 $^\circ\text{C}$ to +125 $^\circ\text{C}$
Storage temperature, $T_S$	-55 $^\circ\text{C}$ to +150 $^\circ\text{C}$

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.
