

## Interactive Catalog Replaces Catalog Pages

Honeywell Sensing and Control has replaced the PDF product catalog with the new **Interactive Catalog**. The **Interactive Catalog** is a power search tool that makes it easier to find product information. It includes more installation, application, and technical information than ever before.

# Solid State Sensors

## Linear Current Sensors

CS Series

### FEATURES

- Linear output
- AC or DC current sensing
- Through-hole design
- Fast response time
- Output voltage isolation from input
- Minimum energy dissipation
- Maximum current limited only by conductor size
- Adjustable performance and built-in temperature compensation assures reliable operation
- Accurate, low cost sensing
- Operating temperature range -25 to 85°C
- Housing: PET polyester

### LINEAR CURRENT SENSORS

MICRO SWITCH CS series linear current sensors incorporate our 91SS12-2 and SS94A1 linear output Hall effect transducer (LOHET™). The sensing element is assembled in a printed circuit board mountable housing. This housing is available in four configuration as shown in mounting dimension figures 1, 1a, 2 and 2a. Normal mounting is with 0.375 inch long 4-40 screw and square nut (not provided) inserted in the housing or a 6-20 self-tapping screw. The combination of the sensor, flux collector, and housing comprises the holder assembly. These sensors are ratiometric.

### ORDER GUIDE — BOTTOM MOUNT WITH 9SS SENSOR, SOURCE OUTPUT

| Catalog Listing | Mtg. Dim. Fig. | Supply Volt. (Volts DC) | Supply Current (mA Max.) | Sensed Current (Amps Peak) | Offset Volt. (Volts $\pm 10\%$ ) | Sensitivity mV-N* At 12 VDC |           | Offset Shift (%/°C) | Response Time (μ Sec.) |
|-----------------|----------------|-------------------------|--------------------------|----------------------------|----------------------------------|-----------------------------|-----------|---------------------|------------------------|
|                 |                |                         |                          |                            |                                  | Nominal                     | $\pm$ TOL |                     |                        |

NOTE: When monitoring purely AC current with zero DC component, a capacitor can be inserted in series with the output of the current sensor. The capacitor will block out the effect of the temperature variation of the offset voltage which increases the accuracy of the device.

\* N = number of turns
