

FEATURES

- Heavy Industrial CE Approval (amplified only)
- As Low As ±0.1% Pressure Non Linearity
- Rugged Construction: Can Withstand 50g Shock/20g Vibration
- Up to -40°C to +125°C Operating Temperature Range
- Excellent Stability
- Various Output, Pressure Ports and Electrical Connections

APPLICATIONS

- Process Controls
- Tank Level Measurement
- Filter Performance Monitoring
- Corrosive Fluids and Gas Measurement Systems
- Flow Measurements

D5100

Industrial Differential Pressure Transducer

SPECIFICATIONS

- 316L Stainless Steel Wetted Surface
- · Voltage, Current, and mV Outputs
- True Wet/Wet Differential
- CE Certified (amplified version only)
- Variety of Pressure Ports and Electrical Connections

The D5100 series from Measurement Specialties sets the price and performance standard for differential pressure transducers used in demanding environments.

The amplified model of the D5100 series exceeds the latest heavy industrial CE requirements including surge protection and reverse polarity protection. The amplified and mV output pressure transducers both have two pressure ports for high and low pressures and all wetted parts are made of 316L stainless steel. They come in a variety of electrical configurations and ranges from 1 to 500 psi (up to 35 Bar).
