## Descriptions

The DIO2112H is an integrated solution for Set-top box and high definition player, and designed to optimize the audio driver circuit performance while reducing the BOM cost by eliminating the peripheral discrete components for noise reduction. DIO2112H features a 2Vrms stereo audio driver that designed to allow for the removal of output AC-coupling capacitors. Featuring differential input mode, gain range of  $\pm 1 \text{ V/V}$  to  $\pm 10 \text{ V/V}$  can be achieved via external gain resistor setting. The DIO2112H is able to offer 2Vrms output with 10kΩ load and 3.3V supply.

Meanwhile, the DIO2112H offers built-in shut-down control circuitry for optimal pop-free performance. Under the under-voltage condition, DIO2112H is able to detect it and mutes the output.
