## DXP.02.A

### Description:

SMD L1/L2/L5 SAW Diplexer For GNSS Band Applications

### Features:

SAW Diplexer SMT Direct Mount

L5 1176.45 / L2 1227.625 / L1 1575.42 MHz GPS/QZSS (L1/L2)

Low Insertion Loss In band

High Isolation Port to Port

Dimensions: 5 \* 5 \* 1.7 mm

RoHS & Reach Compliant

## 1. Introduction

The Taoglas DXP.02.A is a compact SAW diplexer for use in any navigation system application using the GPS/Galileo, GLONASS and BeiDou L1, L2 & L5 bands.

The diplexer is designed to function as both a bandpass filter for each band and to either split one path into three or to combine the bands back into one RF feed. For example, a customer who wanted to use passive antenna elements would need to implement a diplexer in some cases to split the bands out into separate paths. It is also designed to isolate and reject any unwanted GPS signals from getting to the application port.

It is housed in a compact 5\*5\*1.7mm over-molded laminate package and is easy to integrate using SMD process mounting directly onto the target PCB.

For further optimization to customer-specific device environments and for support to integrate and test this antennas performance in your device, contact your regional Taoglas Customer Services Team.

## 2. Specifications

Band 1 (L1)			
	Min.	Typ.	Max.
Center Frequency (MHz)	-	1582.1875	-
Insertion Loss (dB)	-	3.8	4.6
Amplitude Ripple (dB)	-	0.6	2.0
Return Loss (dB)	-	-13	-6.0
Attenuation (Reference level from 0dB)			
10 ~ 1330 (MHz)	32	38	-
1660 ~ 2000 (MHz)	27	33	-
Band 2 (L2 and L5)			
	Min.	Typ.	Max.
Center frequency (MHz)	-	1206.9225	-
Insertion Loss (dB)	-	4.2	5.2
Amplitude Ripple (dB)	-	1.2	2.5
Return Loss (dB)	-	-8	-6
Attenuation (Reference level from 0dB)			
10 ~ 1100 (MHz)	17	23	-
1320 ~ 2000 (MHz)	20	28	-
Band 1 and Band 2			
	Min.	Typ.	Max.
Isolation (1196.9~1248.625MHz)	22	35	-
Isolation (1574.22~1576.62 dB)	22	31	-
Environmental			
Operating Temperature	-40°C to 85°C		
Storage Temperature	-40°C to 85°C		
Input power Level	10 dBm		
DC Voltage	3 V		
Moisture Sensitivity Level (MSL)	1		

### 3. Measurement Circuit

#### 3.1 Test Setup

**Band 1 (L1)**      **Band 2(L2/L5)**

**Common Port**

### 3.2 Return Loss

### 3.3 Common Port to Band 1 Port \_ 1582.1875MHz Attenuation

### 3.4 Common Port to Band 1 Port \_ 1582.1875MHz Insertion Loss

### 3.4 Common Port to Band 1 Port \_ 1206.9225MHz Attenuation

### 3.5 Common Port to Band 2 Port \_ 1206.9225MHz Insertion Loss

### 3.6 Band 1 Port – Band 2 Port Isolation

## 4. Mechanical Drawing (Units: mm)

## 5. Integration Guide

## 5.1 Schematic Symbol and Pin Definition

The circuit symbol for the SAW Diplexer is shown below. The SAW Diplexer has 8 pins as indicated below. The L1 pin represents the higher GNSS frequency bands at 1559 - 1610MHz and the L2 pin represents the lower GNSS frequency bands at 1164 - 1300MHz, including L5, E5a and E5b bands.

Pin	Description
2	Signal Input
5	GPS L2 Output
7	GPS L1 Output
1, 3, 4, 6, 8	Ground

5.2 SAW Diplexer Integration Guide

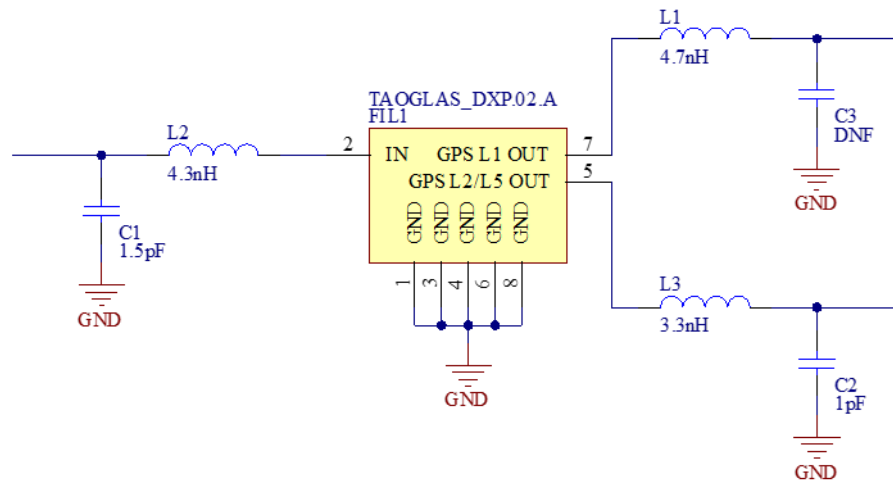

5.3 PCB Layout

## 5.4 Evaluation Board Matching Circuit

Each patch element uses two orthogonal feeds that need to be combined in a Saw Diplexer to ensure optimal axial ratio. Taoglas recommends our DXP.02, a high-performance Saw Diplexer specifically engineered for use with our multi feed patches.

Designator	Type	Value	Manufacturer
L1	Inductor	4.7nH	TDK
L2	Inductor	4.3nH	TDK
L3	Inductor	3.3nH	TDK
C1	Capacitor	1.5pF	Murata
C2	Capacitor	1pF	Murata
C3	Capacitor	Not Fitted	-

## 6. Recommended Reflow Profile

1. Preheating shall be fixed at 150~180°C for 60~90 seconds.
2. Ascending time to preheating temperature 150°C shall be 30 seconds minimum.
3. Heating shall be fixed at 220°C for 50~80 seconds and 260°C as the peak for 20-40 seconds.
4. Time: 2 times.

## 7. Packaging

1000 pcs DXP.02 reel  
 Dimensions - 330\*12mm  
 Weight - 0.2g

4 reels /4000 pcs  
 in one carton  
 Carton Dimensions - 390\*380\*90mm  
 Weight - 1.3Kg
