

Welding Proximity Sensor E2EW Series

DC 2-wire/DC 3-wire

Stable detection in lines containing both aluminum and iron

- Equivalent sensing distances for both iron and aluminum *1
- Enables common design for lines with both iron and aluminum *1
- The exceptional sensing range *2, which means fewer false detections and thereby fewer unexpected stoppages.
- OMRON's unique fluororesin coating technologies enable long-lasting spatter resistance *4, eliminates the need to replace for 10 years *3.
- Durable full metal body to reduce unexpected stoppages
- 2-output (NO+NC) models and models with IO-Link *1 are also available.
- Laser printed information (sensing distance on the sensor head, model on the cable, and model on the metal part of the connector model) can be reducing errors during sensor replacement. *5
- Equipped with a function, which effectively cancels pulse noise of current magnetic field. *1
- UL certification (UL60947-5-2) and CSA certification (CSA C22.2 UL60947-5-2-14)

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Be sure to read *Safety Precautions* on page 35.

*1. PREMIUM Models only.

*2. Based on September 2021 OMRON investigation.

*3. This value assumes that the sensor operates 10 hours a day in an arc welding environment and is cleaned once a month (12 times a year). If our previous model (E2EF-Q) needs to be replaced once every 3 times it is cleaned, the E2EW-Q Proximity Sensor needs to be replaced once every 180 times it is cleaned. This means that there is no need to replace the E2EW-Q Proximity Sensor for 10 or more years.

*4. Models with spatter-resistant coating only.

*5. Models without spatter-resistant coating only.

E2EW Series Model Number Legend

E2EW - (1) X (2) (3) (4) (5) (6) - (7) - (8) (9)

| No. | Type | Code | Meaning | Remarks |
|-----|----------------------|----------|---|--|
| (1) | Case | Blank | Without spatter-resistant coating | |
| | | Q | With spatter-resistant coating | |
| (2) | Sensing distance | Number | Sensing distance (Unit: mm) | |
| (3) | Output configuration | B | DC 3-wire PNP open collector | Whether the D model has polarity is defined by number (8). |
| | | C | DC 3-wire NPN open collector | |
| | | D | DC 2-wire polarity/no polarity | |
| (4) | Operation mode | 1 | Normally open (NO) | |
| | | 2 | Normally closed (NC) | |
| | | 3 | Normally open, Normally closed (NO+NC) | |
| (5) | IO-Link baud rate | Blank | Non IO-Link compliant | |
| | | D | COM2 (38.4kbps) | |
| | | T | COM3 (230.4kbps) | |
| (6) | Size | 12 | M12 | |
| | | 18 | M18 | |
| | | 30 | M30 | |
| (7) | Connection method | Blank | Pre-wired Models | |
| | | M1 | M12 Connector Models | |
| | | M1TGJ | M12 Pre-wired Smartclick Connector Models DC 2-wire | |
| | | M1TJ | M12 Pre-wired Smartclick Connector Models DC 3-wire | |
| (8) | DC 2-wire polarity | Blank | Polarity | |
| | | T | No polarity | |
| (9) | Cable length | Number M | Cable length | |

Note: The purpose of this model number legend is to provide understanding of the meaning of specifications from the model number. Models are not available for all combinations of code numbers.

| | | NC | E2EW-X22B230-M1 | E2EW-X22C230-M1 |
| | | NO+NC | E2EW-X22B3T30-M1 | E2EW-X22C330-M1 |

*1. Models with 5-m cable length are also available with "5M" suffix. (Example: E2EW-X7B1T12 5M)

Note: 1. When embedding the Proximity Sensor in metal, refer to *Influence of Surrounding Metal* on page 36.

2. Models in are equipped with IO-Link (COM3). For IO-Link (COM2), select a model number with the format of "E2EW-X " (Example: E2EW-X7B1D12 2M).

Operation mode NO can be changed to NC via IO-Link communications.

3. IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.

PREMIUM Model

E2EW Series (Triple distance model)

DC 3-wire [Refer to *Ratings and Specifications* on page 24, *Dimensions* on page 38.]

| Size (Sensing distance) | Connection method | Operation mode | Model | |
|----------------------------|---|----------------|-------------------------|------------------------|
| | | | PNP | NPN |
| M12 (6 mm) | Pre-wired (2 m) *1 | NO | E2EW-X6B1T12 2M | E2EW-X6C112 2M |

PNP output (PREMIUM Model)

*3. The timer function of the control output can be set up by the IO-Link communications. (It is able to select ON delay, OFF delay, one-shot, or ONOFF delay function and select a timer time of 1 to 16,383ms (T).)

*4. The excessive proximity diagnosis function can be selected by the IO-Link communications.

*5. The instability detection diagnosis can be selected by the IO-Link communications.

*6. The judgment time for the instability detection diagnosis can be selected by the IO-Link communications. (For the ON delay timer function, the setting can be selected from 0 (invalid), 10, 50, 100, 300, 500, or 1000 ms.)

*7. The judgment distance of the excessive proximity diagnosis function can be selected by the IO-Link communications. (The distance can be selected as a combination of the material of the object detected, such as iron, aluminum, or SUS and the judgment distance of approximately 10, 20, or 30%. However, it is not allowed to select a combination of aluminum and 10%.)

Please contact your OMRON sales representative regarding the IO-Link setup file (IODD file).

Please contact your OMRON sales representative regarding assignment of data.

*1. For models with IO-Link, the operation mode can be changed by the IO-Link communications.

*2. If using a model with IO-Link as a general sensor or using a model without IO-Link, it operates in the standard I/O mode (SIO mode).

Safety Precautions

Be sure to read the precautions for all models in the website at: <http://www.ia.omron.com/>.

Warning Indications

| | |
|------------------------------------|--|
| ⚠ WARNING | Warning level Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage. |
| Precautions for Safe Use | Supplementary comments on what to do or avoid doing, to use the product safely. |
| Precautions for Correct Use | Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance. |

Meaning of Product Safety Symbols

| | |
|---|--|
|  | General prohibition Indicates the instructions of unspecified prohibited action. |
|  | Caution, explosion Indicates the possibility of explosion under specific conditions. |

⚠ WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Otherwise, explosion may result. Never use the product with an AC power supply.

Precautions for Safe Use

The following precautions must be observed to ensure safe operation.

1. Do not use the product in environments subject to flammable or explosive gases.
2. Do not attempt to disassemble, repair, or modify the product.
3. Do not use a voltage that exceeds the rated operating voltage range.
Applying a voltage that is higher than the operating voltage range may result in explosion or fire.
4. Be sure that the power supply polarity and other wiring is correct. Incorrect wiring may cause explosion or fire.
5. If the power supply is connected directly without a load, the internal elements may explode or burn.
6.  Dispose of the product according to applicable regulations (laws).

Precautions for Correct Use

Do not use the product in any atmosphere or environment that exceeds the ratings.

Operating Environment

1. Do not install the Sensor in the following locations.
 - (1) Outdoor locations directly subject to sunlight, rain, snow, water droplets, or oil.
 - (2) Locations subject to atmospheres with chemical vapors, in particular solvents and acids.
 - (3) Locations subject to corrosive gases.
2. The Sensor may malfunction if used near ultrasonic cleaning equipment, high-frequency equipment, transceivers, cellular phones, inverters, or other devices that generate a high-frequency electric field. Please refer to the Precautions for Correct Use on the OMRON website (www.ia.omron.com) for typical measures.
3. Laying the Proximity Sensor wiring in the same conduit or duct as high-voltage wires or power lines may result in incorrect operation and damage due to induction. Wire the Sensor using a separate conduit or independent conduit.
4. Never use thinner or other solvents. Otherwise, the Sensor surface may be dissolved.
5. When turning on the power by influence of temperature environment, an output mis-pulse sometimes occurs. After the sensor has passed for 300 msec after turning on, please use in the stable state.
6. The sensor is adjusted with a high degree of accuracy, so do not use in the environment with sudden temperature change.
7. Operation check is performed using an OMRON's IO-Link master. If using an IO-Link master from another company, perform the operation check in advance. (Models with IO-Link only.)
8. When connecting non IO-Link compliant models to the IO-Link master, use the SIO mode.
9. In the IO-Link mode, the cord between the IO-Link master and sensor must have a length of 20 m or less. (Models with IO-Link only.)
10. The Sensor cannot be used embedded in where pressure is constantly applied to the sensing surface, such as hydraulic cylinders and hydraulic valves.

E2EW Series

Design

Influence of Surrounding Metal

When mounting the Proximity Sensor, ensure that the minimum distances given in the following table are maintained. If you use a nut, only use the provided nut. And ensure that the minimum distances between the sensing surface and nut is bigger than the "L" given in the following table. Other non-ferrous metals affect sensor's performance in the same way as aluminum. Perform the operation check in advance.

(Unit: mm)

Mounting panel material: Iron

Mutual Interference

When installing two or more Proximity Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

(Unit: mm)

| Models | Model | Item | |
|--------------------------|----------------|------|-----|
| | | A | B |
| Quadruple distance model | E2EW-(Q)X7□12 | 45 | 40 |
| | E2EW-(Q)X12□18 | 80 | 60 |
| | E2EW-(Q)X22□30 | 135 | 110 |
| Triple distance model | E2EW-(Q)X6□12 | 45 | 40 |
| | E2EW-(Q)X10□18 | 80 | 60 |
| | E2EW-(Q)X20□30 | 135 | 110 |
| Double distance model | E2EW-(Q)X3□12 | 40 | 35 |
| | E2EW-(Q)X7□18 | 65 | 60 |
| | E2EW-(Q)X12□30 | 110 | 100 |
| Single distance model | E2EW-(Q)X2□12 | 40 | 35 |
| | E2EW-(Q)X5□18 | 65 | 60 |
| | E2EW-(Q)X10□30 | 110 | 100 |

Chips from Cutting Aluminum

Normally, chips from cutting aluminum will not cause a detection signal to be output even if it adheres to or accumulates on the detection surface. In the following cases, however, a detection signal may be output.

Remove the cutting chips in these cases.

- If $d \geq 2/3D$ at the center of the detection surface where d is the cutting chip size and D is the detection surface size

(Unit: mm)

| Model | Dimension | D |
|--------------|-----------|----|
| E2EW-(Q)X□12 | | 10 |
| E2EW-(Q)X□18 | | 16 |
| E2EW-(Q)X□30 | | 28 |

- If the cutting chips are pressed down

Mounting

Tightening Force

Do not tighten the nut with excessive force.

A washer must be used with the nut.

The tightening force must be the same or less than the figures in the following table.

Quadruple distance model, Triple distance model (Unit: N·m)

| Size | Torque |
|------|----------|
| M12 | 20 (15) |
| M18 | 70 (35) |
| M30 | 180 (60) |

* Tighten the nut of the E2EW-Q to a torque in parentheses.

Double distance model, Single distance model (Unit: N·m)

| Size | Torque |
|------|----------|
| M12 | 30 (15) |
| M18 | 70 (35) |
| M30 | 180 (60) |

* Tighten the nut of the E2EW-Q to a torque in parentheses.

Note: When mounting the Proximity Sensor, only use the provided nut. Do not use set screws. The Sensor may malfunction.

E2EW Series

Dimensions

(Unit: mm)
Tolerance class IT16 applies to dimensions in this data sheet unless otherwise specified.

Round Water-resistant Connectors (M12 Smartclick)

XS5

Round Water-resistive Smartclick Connectors that Reduce Installation Work

- A newly developed lock mechanism that is compatible with round M12 connectors.
- Simply insert the Connectors, then turn them approximately 1/8 of a turn to lock.
- A positive click indicates locking.
- Spatter-resistant Cables are also available.
- IP67 degree of protection.
- UL approved products.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Note: For details, refer to XS5 on your OMRON website.

Ordering Information

Sensor I/O Connectors

A Sensor I/O Connector is not provided with the Sensor. It must be ordered separately as required.

| Appearance | Cable Specification | Type | Cable diameter (mm) | Cable Connection Direction | Cable length (m) | Sensor I/O Connector model number | Applicable Proximity Sensor model number | | |
|---|-------------------------|--------------------------|---------------------------------------|-------------------------------|------------------------------------|-----------------------------------|--|-----------------|-----------------|
| M12 Smartclick Connector Straight type  | PVC robot cable | Sockets on One Cable End | 6 dia. | Straight | 1 | XS5F-D421-C80-F | E2EW, E2E NEXT, E2EF, E2FM (M12 Pre-wired Smartclick Connector, M12 Connector) | | |
