

## Distance-settable Photoelectric Sensor TOF Laser Sensor

# E3AS-F Series

### Optimal sensing distance (50 to 1,500 mm) for use on conveyor lines

- Wide sensing distance of 50 to 1,500 mm\*, enabling use on any conveyor line width
- Time of flight (TOF) type sensors for use with any type of conveyed object
- Compact body can be mounted anywhere
- (Metal body (SUS316L), Plastic body type (PBT/PC))
- Teaching method allows anyone to set optimal threshold values
- Manufactured using Omron's proprietary laser sealing method (IP67/IP69K/IP67G)
- Antifouling coatings reduce the cleaning frequency on the lens.
- IO-Link reduces time required for startups and changeovers

\* The sensing distance of the E3AS-F1500 series.

Please contact your Omron sales representative regarding the IO-Link setup file (IODD file).

**Note:** Shown above are the factory settings. Refer to the index list for the default settings at time of shipment from factory.

PNP/COM output logic can be reversed by IO-Link communication.

The operation indicator (orange) lights up when control output 1 is ON or communication output is 1.

## Safety Precautions

Be sure to read the precautions for all models in the website at: <http://www.ia.omron.com/>.

### Warning Indications

 <b>WARNING</b>	<b>Warning level</b> Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.
 <b>CAUTION</b>	<b>Caution level</b> Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury or in property damage.
<b>Precautions for Safe Use</b>	Supplementary comments on what to do or avoid doing, to use the product safely.
<b>Precautions for Correct Use</b>	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance.

### Meaning of Product Safety Symbols

	<b>General prohibition</b> Indicates the instructions of unspecified prohibited action
	<b>Caution, explosion</b> Indicates the possibility of explosion under specific conditions
	<b>Laser Caution</b> Indicates information related to laser safety

#### **WARNING**

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purpose.

#### **CAUTION**

Never use the product with an AC power supply. Otherwise, explosion may result.

### To safely use laser products

#### **WARNING**

Do not expose your eyes to the laser beam either directly or indirectly (i.e., after reflection from a mirror or shiny surface). The laser beam has a high power density and exposure may result in loss of sight.

Laser safety measures for laser equipment are stipulated in Japan and other countries. For usage in Japan and for export to other countries combined with other products, follow the instructions described below categorized in three cases respectively.

#### 1. Usage in Japan

The JIS C6802:2014 standard stipulates the safety precautions that users must take according to the class of the laser product. This product is classified into Class 1 defined by this standard.

#### 2. Usage in U.S.

When this product is installed in a device and exported to the U.S., it is subjected to the U.S. FDA (Food and Drug Administration) laser regulations. This product is classified into Class 1 by the IEC 60825-1:2007 standard according to the provisions of Laser Notice No. 50 of the FDA standard. This product is already reported to CDRH (Center for Devices and Radiological Health).

Accession Number: 1920014-000

Because the product is small, we can not attach an FDA certification label on the main body, so we enclose it in the packing box. When exporting a device equipped with the product to the U.S., attach an FDA certification label near the sensor mounting of customer equipment.

This laser product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007

#### 3. Usage in China

This product is classified into Class 1 by the IEC60825-1:2007 standard.

#### 4. Usage in a country other than U.S. and China.

This product is classified into Class 1 by the IEC60825-1:2014 standard.

## Precautions for Safe Use

The following precautions must be observed to ensure safe operation.

- (1) Do not reverse the power supply connection or connect to an AC current.
- (2) Do not short the load.
- (3) Be sure that before making supply the supply voltage is less than the maximum rated supply voltage (30 VDC).
- (4) Do not use the product in environments subject to flammable or explosive gases.
- (5) Do not use the product under a chemical or an oil environment without prior evaluation.
- (6) Do not attempt to modify the product.

## Precautions for Correct Use

- (1) Do not hit the product using a hammer for installation.
- (2) The product must be installed with the specified torque or less. For M8 connector, the proper tightening torque is from 0.3 to 0.4 N·m. For M12 connector, the proper tightening torque is from 0.39 to 0.49 N·m. In case of M12 smartclick connector, manually tighten the connector.
- (3) Do not use the product in any atmosphere or environment that exceeds the ratings.
- (4) Output pulses may occur when the power supply is turned OFF. We recommend that you turn OFF the power supply to the load or load line first.
- (5) Use an extension cable less than 100 m long for Standard I/O mode and less than 20 m for IO-Link Communication mode.
- (6) Do not pull on the cable with excessive strength.
- (7) Please wait for at least 500 ms after turning on the product's power until it is available for use.
- (8) Though this is type IP67, do not use in the water, rain or outdoors.
- (9) If the Sensor wiring is placed in the same conduits or ducts as high-voltage or high-power lines, inductive noise may cause malfunction or damage. Wire the cables separately or use a shielded cable.
- (10) Do not use the product in locations subject to direct sunlight.
- (11) Do not use the product where humidity is high and dew condensation may occur.
- (12) Do not use the product where corrosive gases may exist.
- (13) If high-pressure washing water and so on hits the teach button, it might lead to malfunctioning. So, consider use of the key lock function.
- (14) Do not apply high-pressure washing water directly to the sensor's light emitting / receiving surface from a short distance. As the antifouling feature may be impaired, keep a sufficient distance from the light emitting / receiving surface.
- (15) Do not use the product at a location subject to shock or vibration.
- (16) To use a commercially available switching regulator, FG (frame ground) must be grounded.
- (17) Do not use organic solvents (e.g. paint thinner and alcohol) for cleaning. Otherwise optical properties and protective structure may deteriorate.
- (18) Be sure to check the influence caused by surrounding environments such as background objects and LED lighting before using the product.
- (19)  Please dispose in accordance with applicable regulations.
