

MODEL EGAXT ACCELEROMETER

SPECIFICATIONS

- **Miniature Design**
- **mV Output DC Response**
- **Critically Fluid Damped**
- **10,000 g Over-range Stops**
- **Broad Temperature Range**

The **Model EGAXT** miniature accelerometer combine a damping ratio of 0.7 (nominal) with built-in over-range stops that protect the unit against 10,000g shocks. This is ideal for applications which may experience rough handling or in situations where the accelerometer must survive a high initial overload in order to make a low g measurement.

The model EGAXT features a common piezo-resistive Wheatstone Bridge design with a mV output. The accelerometer incorporates an inline temperature compensation module which ensures accurate output over full operating temperature range.
