EV2016DD-00A
42V Input Voltage, Low Power
Adjustable Output Linear Regulator EV Board

The Future of Analog IC Technology

DESCRIPTION

The MP2016 is a low power linear regulator that supplies power to systems with high voltage batteries. It includes a wide 4V to 42V input range, low dropout voltage and low quiescent supply current.

The MP2016 provides excellent line transient response time and 50dB power supply rejection ratio (PSRR). The MP2016 can be set externally from 1.2V to 24V through 2 resistors divider.

The MP2016 also includes thermal shutdown and current limiting fault protection, and is available in a QFN-8 package.
