

# EVL2328-TL-00A

## High-Efficiency, 28V, 2A, 430kHz Synchronous Step-Down Converter In SOT583 Package

### DESCRIPTION

The EVL2328 Evaluation Board is designed to demonstrate the capabilities of MPS' MP2328.

The MP2328 is a fully-integrated high-frequency, synchronous rectified, step-down, switch-mode converter with internal power MOSFETs. It offers a very compact solution to achieve a 2A continuous output current over a wide input range, with excellent load and line regulation. The MP2328 has synchronous-mode operation for high efficiency over wide output current-load range.

Constant On-Time control operation provides very fast transient response and easy loop design as well as very tight output regulation.

Full protection features include SCP, OCP, UVP and thermal shutdown.

The MP2328 requires a minimal number of readily-available, standard, external components and is available in a space-saving SOT583 package.

### ELECTRICAL SPECIFICATION

Parameter	Symbol	Value	Units
Input Voltage	V <sub>IN</sub>	6.5 - 28	V
Output Voltage	V <sub>OUT</sub>	5	V
Output Current	I <sub>OUT</sub>	0 - 2	A

### FEATURES

- Wide 4.5V-to-28V Operating Input Range
- 115mΩ/55mΩ Low-R<sub>DS(ON)</sub> Internal Power MOSFETs
- 160μA Quiescent Current
- >92% Efficiency for 24V to 5V/2A Condition
- Power Save Mode at Light Load
- Fast Load Transient Response
- 430kHz Switching Frequency
- Ton Extension for Improve Dropout
- Programmable Soft-Start Time
- Power Good Indication
- Hiccup Mode OCP/OVP Protection
- Thermal Shutdown Protection
- Includes an MPS-optimized Power Inductor

### APPLICATIONS

- Game Consoles
- Digital Set-Top Boxes
- Flat-Panel Television and Monitors
- General Purposes Power Supply

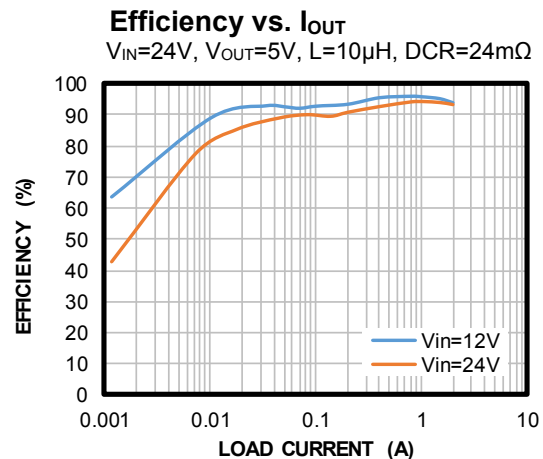

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS", the MPS logo, and "Simple, Easy Solutions" are registered trademarks of Monolithic Power Systems, Inc. or its subsidiaries.

## EVL2328-TL-00A EVALUATION BOARD

(L × W × H) 6.35cm x 6.35cm x 0.75cm

Board Number	MPS IC Number
EVL2328-TL-00A	MP2328GTL

## QUICK START GUIDE

The output voltage of this board is set to 5V. The board layout accommodates most commonly used components. Following are steps to quick start EVL2328-TL-00A.

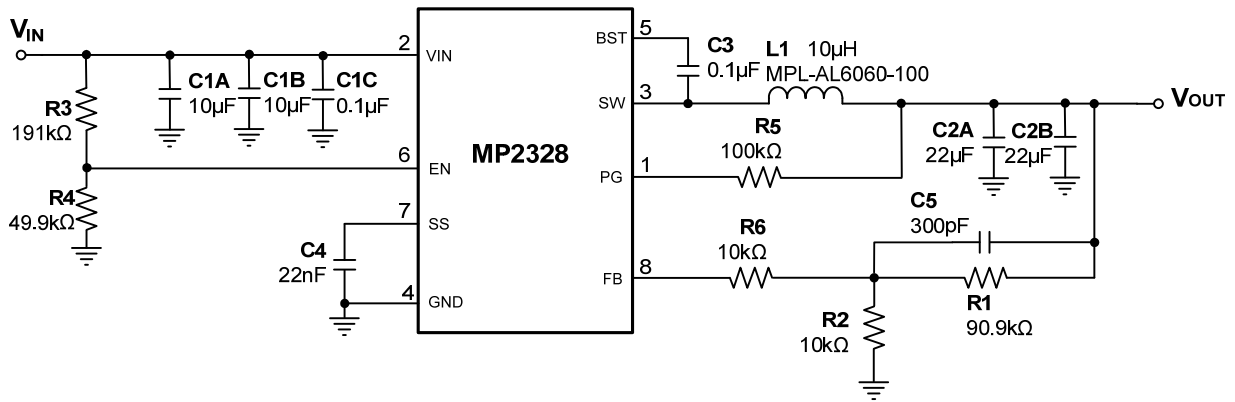

1. Preset Power Supply to  $6.5V \leq V_{IN} \leq 28V$ .
2. Turn Power Supply off.
3. Connect Power Supply terminals to:
  - a. Positive (+): VIN
  - b. Negative (-): GND
4. Connect Load to:
  - a. Positive (+): VOUT
  - b. Negative (-): GND
5. Turn Power Supply on after making connections.
6. The MP2328 is enabled on the evaluation board once VIN is applied.
7. The output voltage VOUT can be changed by varying R1 and R2. Calculate the new value using the formula:

$$V_{OUT} = V_{FB} \times \left(1 + \frac{R1}{R2}\right)$$

Where  $V_{FB} = 0.5V$ .

8. To use the Enable function, apply a digital input to the EN pin. Drive EN higher than 1.3V to turn on EVL2328-TL-00A or less than 1V to turn it off. The EN voltage must not exceed 6V max to avoid damaging the internal circuit.

### EVALUATION BOARD SCHEMATIC

**EVL2328-TL-00A BILL OF MATERIALS**

Qty	Ref	Value	Description	Package	Manufacturer	Manufacturer PN
1	L1	10 $\mu$ H	Inductor, RDC=24m $\Omega$ , Isat=6.6A	SMD	MPS	MPL-AL6060-100
