

## Evaluation kit environment for L62xx family of dual brush DC and stepper motor drivers based on STM32 Nucleo

### Features

- Voltage range from 8 V to 52 V
- Phase current up to 2.8 A r.m.s (with L6205, L6206, L6207 and L6208 devices) or 1.4 A r.m.s. (with L6225, L6226, L6227 and L6228 devices)
- Easy interchangeable plug-in boards for quick evaluation of the whole stepper and brush DC drivers of the L62xx family
- Programmable high-side overcurrent protection (L6206 and L6226 devices)
- Programmable OFF-time of the PWM current control (L6207, L6227, L6208 and L6228 devices)
- Compatible with Arduino UNO R3 connector
- RoHS compliant

### Description

The [EVL62XX-MAIN](#) is an expansion board that can host small [EVL62XX-PLUG](#) plug-in boards for quick and easy evaluation of brush DC and stepper motor drivers of the L62xx family.

These boards provide an affordable and easy-to-use solution to drive dual brush DC and bipolar stepper motors in association with the evaluation software STSPIN Studio.

The EVL62XX-MAIN is compatible with the Arduino UNO R3 connector.
