

# SI4 series

## Industrial-grade SATA3 SSD

### Specifications

#### Capacity

- SI4 Standard
  - 2.5-inch: 120–7680 GB
  - mSATA: 120–960 GB
  - M.2 2280: 120–7680 GB
- SI4 Max
  - 2.5-inch: 120–960 GB
  - mSATA: 120–240 GB
  - M.2 2280: 120–960 GB

#### Components

- Controller: Marvell 88SS1074//88SS1079/88SS1080
- Flash: 3D TLC
- DRAM: DDR3

#### Compliance

- SATA 3.2 compatible with 6/3/1.5 Gb/s rates
- ATA/ATAPI ACS3 command set compliant
- NCQ: Up to 32 Queue Depth
- Enhance SMART ATA feature set
- Data set management TRIM command
- OS aware host hot plug / removal

#### Performance (up to)<sup>1</sup>

- Sequential read: 550 MB/s
- Sequential write: 535 MB/s
- Random 4K read: 98,000 IOPS
- Random 4K write: 90,000 IOPS

#### Power management

- DIPM / HIPM
- Auto idle
- SATA link power management
- Temperature monitoring and proprietary thermal management algorithm

#### Security (Optional)

- AES-256 encryption
- Full disk encryption (FDE) as self-encrypting drive (SED) with TCG Opal 2.0
- Security erase
- Cryptographic firmware image signing

#### Latency (QD1)

- Read: 100  $\mu$ s
- Write: 40  $\mu$ s

#### Reliability

- Advanced LDPC error correction
- Global static and dynamic wear leveling
- Hardware power-off protection
- UBER: <1 sector per  $10^{17}$  bits read
- MTBF: 2.0 million hours

#### Endurance (JESD219 enterprise, client)<sup>2</sup>

- SI4 Standard: 0.6 DWPD, 2 DWPD @ 3 years
- SI4 Max: 5 DWPD, 10 DWPD @ 3 years

#### Data retention

- JESD218A-compliant

#### Compatibility

- Windows 10/8.1/7
- Windows Server 2016/2012 R2/2012
- CentOS, Fedora, FreeBSD, openSUSE, Red Hat, Ubuntu, VMware ESXi, Citrix, KVM

#### Mechanical form factor

- 2.5-inch: 100.5 mm x 69.85 mm x 7 mm
- mSATA: 50.8mm x 29.85mm x 3.4mm
- M.2 2280: 80 mm x 22 mm x 3.5 mm

#### Power consumption (TYP)

- Active: <4 W
- Idle: <0.5 W

#### Environment

- Operating temperature: -40–85 °C
- Storage temperature: -50–95 °C

#### Shock & vibration

- Operating: 50 G  
(11 ms duration, half sine wave)
- Non-operating: 1500 G  
(0.5 ms duration, half sine wave)
- Vibration: 10 G  
(peak, 10–2000 Hz)

#### Warranty

- 3-year limited warranty<sup>3</sup>

**Specification notes:**

1. Performance claims
  - a. Actual performance may vary based on the hardware, software, and overall system configuration.
  - b. Sequential performance is measured with 128 KB transfer size, QD 32 and 4 KB alignment with Iometer.
  - c. Random performance is sustained performance measured with 4K/8K transfer size, QD 32 and 4 KB alignment with Iometer.
  - d. Performance test platform: CPU: Intel Core i7 4770K; motherboard: ASUS Z87-DELUXE; chipset: Intel Z87 Express; OS: Windows 8.1 Pro x64.
2. Endurance claims
  - a. DWPD stands for Drive Writes Per Day.  $TBW = DWPD * capacity * warranty * 365 / 1000$ .
  - b. Access patterns used for random workload during endurance testing is compliant with the JESD219 standard.
3. Limited warranty details: please refer to limited warranty policy and warranty terms.

### 3. Product overview

Exascend provides customizable hardware and firmware design service of cutting-edge SSD products for advanced storage systems. Our products are designed specifically for high reliability commercial, enterprise data center, and cloud computing applications. Combining world class design R&D, and engineering support capabilities, Exascend strives to provide customers with the best-in-class product and service, enabling enhanced boot times, faster application loading, reduced power consumption and extended reliability. To explore more about our extended engineering support services, i.e., tailored capacity, over-provisioning, operating temperature range, endurance, performance, power, and longevity, please contact Exascend sales representative, or email us at: [sales@exascend.com](mailto:sales@exascend.com)

The S14 series support full-disk self-encryption (SED), featuring FIPS-certified AES-256 hardware encryption engine to provide hardware-based secure data encryption without sacrificing SSD performance. The SED supports TCG Opal 2.0 for trusted computing. When TCG Opal is not enabled, system BIOS can alternatively enable and manage full drive data encryption (FDE) via ATA security command set. Please note, TCG Opal and ATA security function set cannot be activated simultaneously.

Exascend's S14 series is designed for demanding enterprise-level workloads. It supports up to 5 drive writes per day (DWPd) under JESD219 enterprise workloads – or 10 DWPd under JESD219 client workloads – for 3 years.

#### **S14 Standard series:**

Designed for read-intensive enterprise-class workloads, supporting up to 0.6 DWPd under JESD219 enterprise workloads – or 2 DWPd under JESD219 client workloads – for 3 years.

#### **S14 Max series:**

Ideal for extreme, intensive workloads, supporting up to 5 DWPd under JESD219 enterprise workloads – or up to 10 DWPd under JESD219 client workloads – for 3 years.

#### **S14 series product highlights:**

- High I/O performance and throughput bandwidth
- Consistent I/O latency and QoS for enterprise workloads
- Advanced flash management and global wear leveling algorithm that extend drive life
- Data path protection
- Full disk encryption (FDE) as self-encrypting drive (SED) with TCG Opal 2.0
- RAID ECC for exceptional reliability and stability
- Self-Monitoring, Analysis and Reporting Technology (S.M.A.R.T.)
- Proprietary thermal management ensuring consistent performance
- Hardware and firmware-based power loss protection reducing risk of data corruption and device failure
- *Optional customization and tuning services*

Figure 1: SSD functional logic diagram

## 4. Detailed specifications

The Exascend SI4 series provides extreme performance and ultra-high reliability, delivering speeds up to 550 MB/s sequential read, 535 MB/s sequential write, 98,000 IOPS random read, and 90,000 IOPS for full drive 4k random write. Available in a wide variety of form factors, configurations and storage capacities, the SI4 series is ideal for enterprise applications that demand storage devices that can handle extreme workloads and offer steadfast reliability.

### 4.1 Capacity

**Table 2: SI4 logical block address configuration**

SE3 SERIES	UNFORMATTED CAPACITY (TOTAL USER ADDRESSABLE SECTORS IN LBA MODE)
120GB	234,441,648
240GB	468,862,128
480GB	937,703,088
960GB	1,875,385,008
1920GB	3,750,748,848
3840GB	7,501,476,528
7,680 GB	15,002,931,888

**Notes:**

- The LBA count shown represents total user-accessible storage capacity and will remain the same throughout the drive's lifetime.
- The total usable capacity of the SSD may be less than the total physical capacity because a small portion of the capacity is used for NAND flash management and maintenance purposes.

### 4.2 Performance

**Table 3: Drive performance – SI4 series**

Capacity	UNIT	SI4 STANDARD SERIES						
		120GB	240GB	480GB	960GB	1.92TB	3.84TB	7.68TB
Sequential read (128KB)	MB/s	540	550	550	550	550	550	535
Sequential write (128KB)	MB/s	140	300	535	535	535	535	535
Random read (4KB)	IOPS	45,000	85,000	98,000	98,000	98,000	98,000	75,000
Random write (4KB)	IOPS	5,000	10,000	18,000	20,000	20,000	20,000	10,000
TBW (JESD219 enterprise)	TBW	75	150	300	600	1,200	2,400	8,000
TBW (JESD219 client)	TBW	185	370	750	1,500	3,000	6,000	20,000
DWPD (3 years)		0.6 @ JESD219 enterprise 1.5 @ JESD219 client						
Form factor		M.2 & 2.5 Inch						

**Table 3: Drive performance – SI4 series**

Capacity	UNIT	SI4 MAX SERIES				
		120GB	240GB	480GB	960GB	1.92TB
Sequential read (128KB)	MB/s	540	550	550	550	550
Sequential write (128KB)	MB/s	400	535	535	535	535
Random read (4KB)	IOPS	75,000	85,000	98,000	98,000	98,000
Random write (4KB)	IOPS	30,000	60,000	60,000	72,000	70,000
TBW (JESD219 enterprise)	TBW	1,100	2,200	4,400	8,500	17,000
TBW (JESD219 client)	TBW	3,500	7,000	14,000	27,500	55,000
DWPD (3 years)	5 @ JESD219 enterprise 10 @ JESD219 client					
Form factor		M.2 & 2.5 Inch				2.5 Inch

**Notes:**

- Measured with device connected as secondary drive.
- Actual performance may vary based on the hardware, software, and overall system configuration.
- Sequential performance is measured with 128 KB transfer size, QD 32 and 4 KB alignment with Iometer.
- Random performance is sustained performance measured with 4K/8K transfer size, QD 32 and 4 KB alignment with Iometer.
- Performance test platform: CPU: Intel Core i7 4770K; motherboard: ASUS Z87-DELUXE; chipset: Intel Z87 Express; OS: Windows 8.1 Pro x64.

### 4.3 Latency

**Table 4: Drive latency – SI4 series**

PARAMETER	UNIT	SI4 SERIES						
		120 GB	240 GB	480 GB	960 GB	1.92 TB	3.84 TB	7.68TB
Read (TYP)	µs	100	100	100	100	110	110	110
Write (TYP)	µs	40	40	40	40	40	40	40

**Notes:**

- Measured with device connected as secondary drive.
- Actual performance may vary based on the hardware, software, and overall system configuration.
- Latency is measured through FIO with QD1 random read/write workload when the drive has entered steady state.
- Performance test platform: CPU: Intel Core i7 4770K; motherboard: ASUS Z87-DELUXE; chipset: Intel Z87 Express; OS: Windows 8.1 Pro x64.

#### 4.4 Quality of Service

**Table 5: QoS – SI4 Standard Series**

Specification	Unit	Queue Depth = 1						
		120 GB	240GB	480GB	960GB	1920GB	3840GB	7680GB
<b>Quality of Service (99%)</b>								
<b>Reads</b>	µs	150	150	150	150	150	150	150
<b>Writes</b>	µs	120	120	120	120	120	120	250
<b>Quality of Service (99.9%)</b>								
<b>Reads</b>	µs	200	200	200	200	200	200	200
<b>Writes</b>	µs	350	350	350	350	350	350	750
<b>Quality of Service (99.99%)</b>								
<b>Reads</b>	µs	350	350	350	350	350	350	350
<b>Writes</b>	µs	1500	1500	1500	1500	1500	1500	1500

**Table 6: QoS – SI4 Max Series**

Specification	Unit	Queue Depth = 1					
		120 GB	240GB	480GB	960GB	1920GB	3840GB
<b>Quality of Service (99%)</b>							
<b>Reads</b>	µs	150	150	150	150	150	150
<b>Writes</b>	µs	120	120	120	120	120	120
<b>Quality of Service (99.9%)</b>							
<b>Reads</b>	µs	200	200	200	200	200	200
<b>Writes</b>	µs	300	300	300	300	300	300
<b>Quality of Service (99.99%)</b>							
<b>Reads</b>	µs	325	350	350	350	350	350
<b>Writes</b>	µs	750	800	800	800	800	800

#### 4.5 Environment specification

**Table 7: Environmental specification table**

PARAMETER	VALUE
<b>Operating temperature</b>	-40–85 °C
<b>Storage temperature</b>	-50–95 °C
<b>Power supply voltage range</b>	2.5": 5.0 V ± 10% M.2: 3.3 V ± 5% mSATA: 3.3 V ± 5%
<b>Humidity (non-condensing)</b>	5–95% (Operating)
<b>Vibration</b>	10 G (peak, 10–2000 Hz)
<b>Shock (operating)</b>	50 G, (11 ms duration, half sine wave)
<b>Shock (non-operating)</b>	1500 G, (0.5 ms duration, half sine wave)

#### 4.6 Power consumption

**Table 8: SI4 series power consumption table**

PARAMETER	UNIT	120 GB	240GB	480GB	960GB	1920GB	3840GB	7680GB
Active Write-Average	W	<1.2	<2.4	<3.15	<3.45	<3.51	<3.55	<3.55
Active Write-Burst	W	<1.6	<3.2	<4.3	<4.45	<4.50	<4.55	<4.55
Active Read-Average	W	<1.525	<1.6	<1.55	<1.55	<1.5	<1.8	<1.8
Active Read-Burst	W	<2.3	<2.25	<2.3	<2.25	<2.22	<2.4	<2.4
Idle	W	<0.5	<0.5	<0.5	<0.5	<0.875	<0.875	<0.875

#### 4.7 Reliability

Products in the Exascend SI4 series meet or exceed SSD endurance and data retention requirements as specified in the JESD218 standard. Reliability specifications are listed in the following table.

**Table 9: Reliability table**

PARAMETER	VALUE
<b>Mean Time Between Failures (MTBF)</b> Mean Time Between Failures is a measure of how reliable a hardware product or a component is. The value describes the expected time between two failures.	2,000,000 hours
<b>Uncorrectable Bit Error Rate (UBER)</b> A metric for the rate of occurrence of data errors, equal to the number of data errors per bits read.	<1 sector per 10 <sup>17</sup>

## 5. Physical dimension diagram

## 7. Compliance

Exascend SI4 series SSD complies with the following specifications:

- FCC
- CE
- RoHS

## 8. Supported ATA commands

Exascend SI4 series SSDs support the ATA commands that are shown in the following table. For details about the ATA commands, please refer to the ATA/ATAPI ACS3 command set specifications.

**Table 19: Supported ATA Command Set**

COMMAND NAME	CODE (HEX)	COMMAND NAME	CODE (HEX)
<b>NOP</b>	00h	Read Multiple	C4h
<b>Data Set Management</b>	06h	Write Multiple	C5h
<b>Read Sectors</b>	20h	Set Multiple Mode	C6h
<b>Read Sectors EXT</b>	24h	Read DMA	C8h
<b>Read DMA EXT</b>	25h	Write DMA	CAh
<b>Read Native Max Address EXT</b>	27h	Write Multiple FUA EXT	CEh
<b>Read Multiple EXT</b>	29h	Standby Immediate	E0h
<b>Read Log EXT</b>	2Fh	IDLE Immediate	E1h
<b>Write Sectors</b>	30h	Standby	E2h
<b>Write Sectors EXT</b>	34h	IDLE	E3h
<b>Write DMA EXT</b>	35h	Read Buffer	E4h
<b>Set Max Address EXT</b>	37h	Check Power Mode	E5h
<b>Write Multiple EXT</b>	39h	Sleep	E6h
<b>Write DMA FUA EXT</b>	3Dh	Flush Cache	E7h
<b>Write Log EXT</b>	3Fh	Write Buffer	E8h
<b>Read Verify Sectors</b>	40h	Read Buffer DMA	E9h
<b>Read Verify Sectors EXT</b>	42h	Flush Cache EXT	EAh
<b>Write Uncorrectable EXT</b>	45h	Write Buffer DMA	EBh
<b>Read Log DMA EXT</b>	47h	Identify Device	ECh
<b>Write Log DMA EXT</b>	57h	Set Features	EFh
<b>Read FPDMA Queued</b>	60h	Security Set Password	0xF1
<b>Write FPDMA Queued</b>	61h	Security Unlock	0xF2
<b>Set Date &amp; Time EXT</b>	77h	Security Erase Prepare	0xF3
<b>Accessible Max Address</b>	78h	Security Erase Unit	0xF4
<b>Execute Device Diagnostic</b>	90h	Security Freeze Lock	0xF5
<b>Download Micro Code</b>	92h	Security Disable Password	0xF6
<b>Download Micro Code DMA</b>	93h	Read Native Max Address	0xF8
<b>SMART</b>	B0h	Set Max Address	0xF9
<b>Sanitize Device</b>	B4h		

## 9. S.M.A.R.T. support

### 9.1 Overview of S.M.A.R.T. support

Data storage drives capture a variety of information during operation that may be used to analyze drive “health.” Drive manufacturers have adopted S.M.A.R.T. (Self-Monitoring, Analysis, and Reporting Technology) to help warn system software, a system administrator, or a user of impending drive failure, when time still remains to take preventive action. The S.M.A.R.T. standard defines the protocols for reporting errors and for invoking self-tests to collect and analyze data on demand. The specification is flexible and provides for individual manufacturers to define their own unique vendor-specific information. This section describes the baseline S.M.A.R.T. commands and attributes supported by products in the Exascend S14 series. Further, it is recommended to consult the list of public S.M.A.R.T. attributes.

### 9.2 S.M.A.R.T. health information

**Table 20: S.M.A.R.T. health information**

ID (Dec)	ID(Hex)	Attribute Name	Description
1	01h	Raw Read Error Rate	Total event count for all correctable and un-correctable ecc, it would be cleared to 0 when exceeding FFFFFFFFh
5	05h	Retired Block Count	Retired block count after leaving factory
9	09h	Power-On Hours	Power on time, culmulative over the life of the device, integer number in hour time units
12	0Ch	Device Power Cycle Count	Culmulative number of power cycle events over the life of the device
165	A5h	Maximum Erase Count	Maximum erase count of all the blocks in the device
166	A6h	Minimum Erase Count	Minimum erase count of all the blocks in the device
167	A7h	Average Erase Count	Average erase count of all the blocks in the device
169	A9h	Remain life/Media Wearout Indicator	Indicate the worn-out status of the device
170	AAh	Available Reserved Space	Percentage of reserved blocks remaining in op
171	ABh	Program Fail Count	Total count of program fails
172	ACh	Erase Fail Count	Total count of erase fails
174	A Eh	Unexpected Power Loss	Total count of unexpected power loss events
183	B7h	Total Sata Link Down Grade Link Count	Total count of the number of times SATA interface selected lower signaling rate due to error Byte0~1: count of failing SATA connection Byte2~3: count of SATA1 Byte4~5: count of SATA2
194	C2h	Temperature	Byte0~1: current temperature Byte2~3: minimum temperature Byte4~5: maximum temperature
198	C6h	ECC On-the-Fly Error Count	Count of un-correctable ecc (UECCC). It is cleared at power-on reset.
199	C7h	Current Sata Interface Crc Count	Count of SATA interface CRC during this power on, it would be cleared to zero during power off
241	F1h	Lifetime Writes from Host System	Data written by host (GB=1024*1024*1024 Byte)
242	F2h	Lifetime Reads to Host System	Data read to host (GB=1024*1024*1024 Byte)
249	F9h	Total Nand Writes	Total data written to NAND (GB=1024*1024*1024 Byte)
250	FAh	Current Sata Link Down Grade Link Count	Count of the number of times SATA interface selected lower signaling rate due to error during this power on, it would be cleared to 0 during power off Byte0~1: count of failing SATA connection Byte2~3: count of SATA1 Byte4~5: count of SATA2
251	FBh	Total Sata Interface Crc Count	Life-time SATA interface CRC count

### 9.3 S.M.A.R.T. Sub command

The SMART feature set command has several separate sub-commands which are selective by host to write it to the devices' features registers before issuing the S.M.A.R.T. The sub-commands are listed below.

**Table 21: S.M.A.R.T. sub command**

Command	Sub-Code
SMART Read Data	D0
SMART Read Attribute Thresholds	D1
SMART Enable/Disable Attribute AutoSave	D2
SMART Execute Off-Line Immediate	D4
SMART Read Log	D5
SMART Write Log	D6
SMART Enable Operations	D8
SMART Disable Operations	D9
SMART Return Status	DA

## Legal information

### Limited Warranty Policy

Exascend, Inc. ("Exascend") warrants that Exascend's product, in its original sealed packaging, will be free from defects in materials and workmanship. Subject to the conditions and limitations set forth below, Exascend will either repair or replace any part of its products that prove defective by reason of improper workmanship or materials. This warranty is non-transferable and valid only for the original purchaser of the Exascend products, except where prohibited by law. The original sales receipt or invoice, or a copy thereof, is required to establish the purchase date and original purchaser.

1. This warranty supersedes all other warranties and representations, whether oral or written, between you and Exascend. Exascend makes no other warranties, including any warranty of merchantability or fitness for a particular purpose, whether expressly or implied.
2. All warranties, whether express or implied, are limited to the periods of time set forth below. Some states and jurisdictions do not allow such exclusion of implied warranties, limitations or warranty period, so above restrictions may not apply to you.
3. Exascend may acknowledge or read and save the data and information (collectively, "Information") stored in the product during after-services. Exascend hereby agrees that Exascend will not disclose any Information to any third parties, except Exascend's employees, who may need to access the Information, with or without your prior written consent.

### Warranty Terms

We offer three (3) years limited warranty for our industrial products.

The warranty period is the SHORTER OF:

- a period of three (3) years beginning from the date of purchase; or
- the period ending when the drive reached advertised DWPD or TBW rating; or
- the period ending when the device's Lifespan indicator has reached 0% or below.

This Limited Warranty will not apply to, and Exascend will have no liability or obligation with respect to, problems or damage resulting from any of the following: (i) accident, modification, neglect, abuse, careless or incorrect handling, misuse or improper operation, disassembly, misapplication or use in unusual physical environments or under operating conditions not approved by Exascend (including, but not limited to, use of the Product with an improper voltage supply); (ii) normal wear and tear; (iii) removal of label(s) or sticker(s) provided on or with the Product (including all warranty or quality-control stickers, product serial or electronic numbers); (iv) problems relating to or residing in non-Exascend hardware, software or other items with which the Product is used; (v) use in an environment, in a manner or for a purpose for which the Product was not designed or not in accordance with Exascend's published documentation; (vi) installation, modification, alteration or repair by anyone other than Exascend or its authorized representatives; (vii) problems that do not relate to materials or workmanship or that have an insignificant impairment on the use or operation of the Product; or (viii) problems related to consumables; (ix) Product purchased "AS-IS" or "with known faults, defects or problems." Additionally, Exascend will have no liability or obligation to recover any data in the Product.

### Disclaimer of liability

Exascend, Inc. reserves the right to make changes to specifications and product descriptions such as but not limited to numbers, parameters and other technical information contained herein without notice. Please contact Exascend, Inc. to obtain the latest specifications. Exascend, Inc. grants no warranty with respect to this datasheet, explicit or implied, and is not liable for direct or indirect damages. Some states do not grant the exclusion of incidental damages and as such this statement may not be valid in such states. The provisions of the datasheet do not convey to the purchaser of the device any license under any patent right or other intellectual property right of Exascend, Inc.

### Customers must not use Exascend products in applications where a device failure or malfunction may cause personal injury or death, e.g., in life support systems or devices.

Exascend shall not be liable for any loss, injury or damage caused by use of the products in any of the following applications:

- Medical-related devices, life support, medical measurement devices, etc.
- Control devices for trains, ships, mass transportation systems or automotive vehicles, etc.

- Specific applications including military/defense-related equipment, aerospace, nuclear facility control systems, etc.
- Safety systems for disaster prevention/crime prevention, etc.

### Copyright notice

Copyright © 2022 Exascend, Inc. All rights reserved. Information contained in this document, including but not limited to any instructions, descriptions, and product specifications, is considered proprietary and confidential to Exascend, Inc. and shall not be modified, used, copied, reproduced or disclosed in whole or in part, in any form or by any means, electronic or mechanical, for any purpose, without the written consent of Exascend, Inc.
