

Grid Dish Parabolic Antenna GD35

GD35: 3400 TO 3600 MHz OPERATION

The 3.5 GHz parabolic grid directional antennas offered by Laird utilize a patented parabolic grid design with a patented high performance dipole feed. The antennas are constructed of welded steel wires which are galvanized and then powder coat painted with a light gray epoxy paint. The wire grid semi-parabolic design offers unsurpassed low wind loading while maintaining good RF performance. The compact low visual impact attractive styling blends well in almost any application. Mounting is simplified with the Laird bracket system made of galvanized steel with stainless steel hardware. The antenna comes with 30 inch pigtail with choice of N male or N female connector.

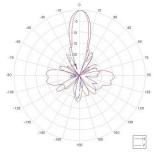

FEATURES **FEATURES**

- 17 dBi, 20 dBi and 25 dBi models available
- Rugged and weatherproof
- Ultra low wind loading and low visual impact
- Vertical or horizontal polarization

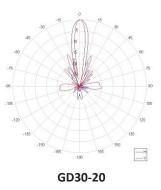

ANTENNA PATTERNS

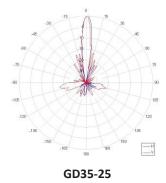

MARKETS

- 3.5 GHz wireless applications
- Point-to-point backhaul
- Cellular backhauls
- Client antennas
- WiMAX
