Interactive Catalog Replaces Catalog Pages

Honeywell Sensing and Control has replaced the PDF product catalog with the new Interactive Catalog. The Interactive Catalog is a power search tool that makes it easier to find product information. It includes more installation, application, and technical information than ever before.

Temperature Sensors

Platinum RTDs

FEATURES

- Linear resistance vs temperature
- Accurate and Interchangeable
- Excellent stability
- Small size
- Printed circuit mountable
- Ceramic SIP package

TYPICAL APPLICATIONS

- HVAC room, duct and refrigerant equipment
- Instrument and probe assemblies
- Electronic assemblies temperature compensation
- Process control temperature regulation

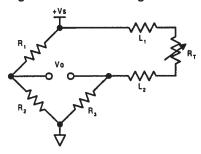

HEL-776 and HEL-777 platinum RTDs are designed to measure temperatures from -55° to $+150^{\circ}$ C (-67° to 302° F) in printed circuit boards, temperature probes, or other lower temperature applications. Solderable leads in 0.050" or 0.100" spacing provide strong connections for wires or printed circuits.

The 1000Ω , 375 alpha version, provides 10x greater sensitivity and signal-tonoise. Both are ideal for air temperature sensing.

CAUTION

PRODUCT DAMAGE

The inherent design of this component causes it to be sensitive to electrostatic discharge (ESD). To prevent ESD-induced damage and/or degradation, take normal ESD precautions when handling this product.
