

The EtherNet/IP to Serial Linking Device allows you to connect any serial device to your ControlLogix™ and CompactLogix™ PLC from Rockwell Automation. The stand-alone Linking Device is less expensive than an in-chassis-based solution, and has even better integration to Studio 5000® from Rockwell Automation.

In short:

EtherNet/IP Adapter Class product which is tightly integrated to Rockwell Studio5000 allowing you to connect serial devices to Rockwell PLCs.

Connect devices that use:

RS232/422/485 interfaces
Modbus RTU
Rockwell DF1

Catalog number:

HMS-EN2SE-R

The EtherNet/IP to Serial Linking Device will:

- Minimize costs when connecting serial devices to your PLC. More cost-efficient than an in-chassis solution.
- Allow you to easily retrofit existing serial devices.
- Speed up configuration — Automated process inside Rockwell Studio5000.

Technical highlights

- Custom Add-On Profile: simplifies configuration and reduces commissioning time, dynamically generates data structures. No need for any ladder logic or Add On Instructions.
- No hardware or software changes for the connected device.
- Does not affect backplane performance (PLC execution time), even when large amount of data is transferred to the Logix PLC.
- EtherNet/IP Adapter Class product supporting announced-based DLR.
- Supports serial RS232/422/485, Modbus RTU and DF1.
- Automatically generates named and structured Studio 5000 controller tags based on the configuration — no need for add-on instructions or creating alias tags.
- Connects up to 31 serial nodes.
- OSHA, CE, UL, ATEX and Haz.Loc. certifications pending.

Integrated into Studio5000

All network and device configuration is done within Studio 5000.
