

HRPM

Hall-Effect Rotary Position Sensor with integrated connector

DESCRIPTION

The HRPM Series of Hall-effect Rotary Position Sensors is a cost-effective, non-contacting position sensing solution for applications in harsh environments such as transportation and industrial.

This compact sensor with integrated AMP superseal connector is based on a touchless concept with separate housings for electronics and magnet. The magnet is mounted on the actuated axis and without wear and tear due to radial forces, the reliability and lifetime are increased significantly.

Fully sealed and flanged mounted for easy positioning, the sensor is versatile with configurable angular ranges from 50 to 360 degrees, option for a bare or housed magnet, different pin-outs and support for low and high-voltage power supply.

KEY FEATURES

True touchless operation

Without any internal or external gears or linkages the sensor is easily assembled and calibrated and free from wear and tear over lifetime.

360 degree absolute position feedback

Endless mechanical rotational angle without dead band, keeps the position on power loss with configurable electrical angles from 50 to 360 degrees.

Made for harsh environments

The rugged package protects the sensor from dust, moisture, vibration and extreme temperatures for usage in the most demanding environments.

Unlimited mechanical life

The separation of electronics and magnet module allows for a virtually unlimited lifetime independent of number of revolutions.

APPLICATIONS

Industrial

- ► Warehouse automatic guided vehicles
- ▶ Valve monitoring
- ► HVAC systems

Heavy-duty transportation vehicles

- ► Steering wheel angle
- ▶ Pedal position for off-road vehicles
- ► Suspension/height detection
- Fork height and mast tilt
- ▶ Bucket position
- ► Hitch position
- ► Transmission gear shift

Hall-Effect Rotary Position Sensor with integrated connector

| MECHANICAL SPECIFICATION | PECIFICATIONS | |
|--|---|--|
| Rotational life | Virtually unlimited | |
| Mechanical range | 360° (endless rotation) | |
| Mating connector | AMP Superseal 282087-1 | |
| Air Gap | 3mm ±1mm | |
| Mounting screw sizes | | |
| Sensor to mounting surface | non-magnetic, stainless steel M4 X 0.7 screws and 8 mm 0D washers | |
| Housed magnet to actuator mounting shaft | | |

| ELECTRICAL SPECIFICATION | SPECIFICATIONS | | |
|----------------------------|----------------------|-----------|--|
| Output Protocol | Analog (Ratiometric) | | |
| Supply voltage | 5V ±10% | 7V to 32V | |
| Supply current | 12 mA | 14 mA | |
| Overvoltage protection | +10V | +36V | |
| Reverse voltage protection | -10V | -30V | |
| Output standard | 10% to 90% Vdc (CW) | | |

| | inverted | |
|--|---|------------------------|
| | Absolute linearity / Accuracy error ¹ | ± 1% (0,5% on request) |
| | Resolution | Up to 12 bit |
| | Self-diagnostic features | yes |

¹ Ferromagnetic materials close to the sensor (i.e. shaft, mounting surface) may affect the sensor's linearity.

| ENVIRONMENTAL SPECIFIC | IVIRONMENTAL SPECIFICATIONS | |
|------------------------|------------------------------|--|
| Operating temperature | -40° to +125°C | |
| Shock | 50g | |
| Vibration | 5-2000 Hz; 20g; Amax 0,75 mm | |
| Sealing | IP67, IP69K | |
