

# Stripline Mounting Non-reflective Terminations

## HT Series

### ■Features

#### 1.High Performance

These super wide bandwidth/ultra high matching non-reflective termination use Hirose Electric original high frequency matching technology.

#### 2.Equipped with Tabs

Termination are equipped with tabs to permit direct mounting to flat circuits.

#### 3.Housing functions as a radiator to permit small size and high-density mounting.

### ■Product Specifications

Ratings	Rated frequency range (Note) Characteristic impedance Maximum Input Power (Note)	DC to 15.0 GHz 50 ohms 0.25 to 50 W	Operating temperature range Operating relative humidity	-10°C to +60°C 95% Max.
---------	----------------------------------------------------------------------------------------	-------------------------------------------	------------------------------------------------------------	----------------------------

NOTE: The frequency range and the maximum input power will differ depending on the products.

#### HT-025-1, HT-025-2, HT-05-2, HT-1-1, HT-1-2, HT-1-3, HT-10-2, HT-20-3, and HT-50-1

Item	Standard	Conditions
1.Vibration	No electrical discontinuity of 1 $\mu$ s or more No damage, cracks, or parts dislocation	Frequency of 10 to 2000 Hz, overall amplitude of 1.52 mm, acceleration of 98 m/s <sup>2</sup> for 2 hours in each of 3 directions
2.Shock		Acceleration of 490 m/s <sup>2</sup> , sine half-wave waveform, 3 cycles in each of the 3 axis
3.Temperature cycle	No damage, cracks, or parts dislocation	Temperature: -55°C → +5°C to +35°C → +85°C → +5°C to +35°C Time: 30 → 15 max. → 30 → 15 max. (Minutes) 200 cycles

●The test method conforms to MIL-STD-202.

#### HT-30-1

Item	Standard	Conditions
1.Vibration	No electrical discontinuity of 1 $\mu$ s or more No damage, cracks, or parts dislocation	Frequency of 10 to 2000 Hz, overall amplitude of 1.52 mm, acceleration of 98 m/s <sup>2</sup> for 2 hours in each of 3 directions
2.Shock		Acceleration of 294 m/s <sup>2</sup> , sine half-wave waveform, 3 cycles in each of the 3 axis
3.Temperature cycle	No damage, cracks, or parts dislocation	Temperature: -55°C → +5°C to +35°C → +120°C → +5°C to +35°C Time: 30 → 15 max. → 30 → 15 max. (Minutes) 200 cycles

●The test method conforms to MIL-STD-202.

### ■Materials

#### HT-025-1, HT-025-2, and HT-05-2

Part	Material	Finish
Tabs	Copper	Solder plating
Resistor	Metal film	———

#### HT-30-1

Part	Material	Finish
Plate	Aluminum	Conductive alumite
Retaining plate	Phosphor bronze	Nickel plating
Tabs	Copper	Tin plating
Resistor	Metal film	———

#### HT-1-1, HT-1-2, and HT-1-3

Part	Material	Finish
Plate	Aluminum	Nickel plating
Tabs	Copper	Solder plating
Resistor	Metal film	———

#### HT-10-2, HT-20-3, and HT-50-1

Part	Material	Finish
Plate	Copper	Nickel plating
Tabs	Copper	Silver plating
Resistor	Metal film	———

## Ordering Information

## ■ Mounting Method

- Do not leave a space between the terminator and the microstrip board.
- Make the terminator tab height from the housing and the thickness of the microstrip board the same amount.
- Note: The HT-025-1 type is attached with high temperature solder (having a melting point of 280°C). The soldering temperature to the microstrip board must be less than this.

- Mounting is performed by soldering over the microstrip line pattern.
- The mounting should be completed by soldering within 5 seconds using Sn-Pb type eutectic solder containing 2 to 5% Ag with a soldering iron adjusted to about 260°C.
- The resoldering of an item that has already been soldered once and then removed is not effective since solder cracks will develop at the electrode portion.

- Do not leave a space between the terminator and the microstrip board.
- Do not leave a space between the the microstrip board.
- Note: The HT-1-1, HT-1-2, HT-1-3, HT-10-2, HT-20-3, and HT-50-1 tabs are attached with high temperature solder (having a melting point of 280°C). The soldering temperature to the microstrip board must be less than this.

Note: Although the high frequency characteristics will deteriorate somewhat, please attach with some slack in the tabs in order to raise the thermal reliability.
