## Product Description

A family of metal face inductive proximity switches in industrial standard stainless steel housings (M8, M12, M18 and M30 types). Output indication: by yellow LED. Outputs are open collector NPN or PNP transistors. Available with cable and M8 or M12 plug.

These sensors stand up to abrasion and impact caused by flying metal chips, grit and misaligned or vibrating targets. In addition, the stainless steel body resists against corrosion and chemical attack, by offering a higher level of protection for more reliable operation and longer life in harsh environments.
