

# Insulating boots for use with IEC inlet filters

## Approvals & Compliances

### RoHS

### Technical specifications

<b>Operation temperature</b>	-10°C to 60°C
	Material thickness

### Features and benefits

There are a full range of insulating boots available from Schaffner EMC that provide a physical cover for the exposed terminals on the back of IEC Inlet Filters. These boots fit the simplest non-fused and unswitched style up to the fully fused and switched IEC filtered inlet. The boots are made from a durable black PVC material that conforms to UL94-V1 flammability requirements. The boots slip easily over the back of the filter and reduce the risk of electrical shock to maintenance personnel whilst protecting the filter from environmental hazard such as the ingress of dust and moisture.
