

IBS04, ICS05 IO-Link 3-wire DC

Miniaturized proximity inductive sensors with IO-Link communication

Benefits

- **A complete family.** Available in Ø4 and M5 male thread robust stainless steel housings with an operating distance of 0.8 to 1.3 mm.
- **High speed detection.** IBS04 and ICS05 inductive proximity sensors can reach an operating frequency of up to 6 kHz.
- **Easy to install.** The active face can be installed flush with the surrounding area. The user can choose between 2 m PVC cable and M8-disconnect plug versions.
- **High precision.** The onboard advanced microcontroller ensures better stability with respect to environmental influences, with highly reliable repeatable measurements between -25 and +70°C.
- **Easy customization to specific OEM requests:** different cable lengths and materials, special labelling, customized pig-tail solutions with special cables and connectors are possible on request.

Description

The IBS04 and ICS05 series represent the optimal solution for industrial automation equipment in applications where space is limited, including tool-selection, robotic position-sensing and control of micro-mechanisms. The advanced electronics is enclosed in a robust stainless steel housing. The availability of the M8-plug and 2m-PVC cable connection allow flexible mounting. On-board IO-Link communication opens up many possibilities, such as easy configuration and set-up of the devices and advanced parameter setting.

Only for IO-Link sensors

- **The output** can be operated either as a switching output or in IO-Link mode.
- **Fully configurable via IO-Link v1.1.** Electrical outputs can be configured as PNP/NPN/Push-pull, normally open or normally closed.
- **Timer functions** can be set, such as switch-on and switch-off delay
- **Adjustable sensing distance and hysteresis:** sensing distance can be set to 62% or 100% of the maximum sensing distance
- **Temperature monitoring:** over or under-run temperature alarms can be set

Applications

- Non contact detection of metal objects in general position-sensing and presence-sensing in industrial applications
- Particularly suitable for rotational speed monitoring thanks to the high operating frequency

Main functions

- Integrated diagnostic function with flashing LED in the event of a short circuit or overload

IO-Link sensors

- The devices can be operated in IO-Link mode once connected to an IO-Link master, or in standard I/O mode.
- In IO-Link mode the switching signals of the sensor are made available in the process data via the IO-Link interface.
- Several sensor functions can be set via the IO-Link interface:
 - ▶ Adjustable switching distance: 62% or 100% of the maximum switching distance.
 - ▶ Adjustable hysteresis: standard or increased value.
 - ▶ Divider function: the sensor gives a signal after a specified number of actuation pulses has been reached.
 - ▶ Switch-on delay: the switching pulse is generated after the sensor actuation.
 - ▶ Switch-off delay: the generation of the switch signal is delayed by the set time after sensor actuation.
 - ▶ Temperature error: temperature is out of specifications.
 - ▶ Temperature over-run and under-run: temperature is out of the limits defined by the user.

C	LED	Yellow LED: Output flashing: short circuit or overload indication
D	M8, 3 pin, male connector	For plug versions only

Sensing

Detection

Rated operating distance S_n	0.8 mm standard range or 1.3 mm extended range
Reference target	The operating distance is measured according to IEC 60947-5-2, using a standard target moving axially. This target is square shape 1 mm thickness, made of steel e.g. type Fe 360 as defined in ISO 630 and it shall be of the rolled finish. The length of the side of the square is equal to – the diameter of the circle inscribed on the active surface of the sensing face, or – three times the rated operating distance S_n whichever is greater
Assured operating sensing distance (S_a)	$0 \leq S_a \leq 0.81 \times S_n$ (e.g. with S_n of 1.3 mm, S_a is 0 ... 1.053 mm)
Effective operating distance (S_r)	$0.9 \times S_n \leq S_r \leq 1.1 \times S_n$
Usable operating distance (S_u)	$0.9 \times S_r \leq S_u \leq 1.1 \times S_r$
Temperature drift	$\leq \pm 10\%$
Hysteresis (H)	1...20%

S: sensor
T: target

Fig. 4 M5 extended range

Sensors with IO-Link communication

Rated operating distance S_n	Programmable via IO-Link: 62% or 100% of the maximum $S_n=1.3\text{mm}$
Hysteresis (H)	Programmable via IO-Link: standard or increased

Correction factors

The specific operating distance S_n refers to defined measuring conditions. The following data have to be considered as general guidelines.

Fig. 5 The rated operating distance is reduced by the use of metals and alloys other than Fe360. The most important reduction factors for inductive proximity sensors are shown in the figure.

Accuracy

Repeat accuracy (R)	$\leq 5\%$
---------------------	------------

Features

Power Supply

Rated operational voltage (U_o)	10 to 30 VDC (ripple included)
Ripple (U_{rpp})	$\leq 10\%$
No load supply current (I_o)	≤ 15 mA
Power ON delay (t_v)	≤ 50 ms

Outputs

	Standard sensors	IO-Link sensors
Output functions	NPN or PNP by sensor type	Configurable via IO-Link: PNP, NPN or push-pull Factory setting: PNP
Output configuration	N.O. and N.C. by sensor type	Configurable via IO-Link: N.O. or N.C. Factory setting: N.O.
Output current (I_o)	≤ 100 mA	
OFF-state current (I_o) (only for PNP or NPN output)	≤ 100 μ A	
Voltage drop (U_d)	Max. 1.2 VDC @ 100 mA	
Protection	Short-circuit, reverse polarity and transients	
Voltage transient	1 kV/0.5 J	

Response times

Operating frequency (f)	≤ 6 KHz	$\varnothing 4$, M5 standard range (S_n : 0.8mm)
	≤ 4.5 KHz	$\varnothing 4$, M5 extended range (S_n : 1.3mm)

Indication

Standard IO mode:

Yellow LED	Output	Description
OFF	OFF	N.O. output, target not present N.C. output, target present
ON	ON	N.O. output, target present N.C. output, target not present
Blinking	f: 2Hz	Short-circuit or overload
	f: 1Hz	Temperature alarm (if enabled)

IO-Link mode:

- LED is ON for 0.75 s and OFF for 0.075 s

- Possibility to disable the LED

Environmental

Ambient temperature	Operating: -25° to +70°C (-13° to +158°F)	
	Storage: -30° to +80°C (-22° to +176°F)	
Ambient humidity	Operating: 35% to 95%	
	Storage: 35% to 95%	
Vibration	10 to 55 Hz, amplitude 1.0 mm; sweep cycle 5 min; in X, Y and Z direction	IEC 60068-2-6
Shock	30 G /11 ms. 10 shocks in X, Y and Z direction	IEC 60068-2-27
Degree of protection	IP67	IEC 60529; EN 60947-1

Compatibility and conformity

EMC protection	IEC 61000-4-2 Electrostatic discharge	8 kV air discharge 4 kV contact discharge
	IEC 61000-4-3 Radiated radiofrequency	3 V/m
	IEC 61000-4-4 Burst immunity	2 kV
	IEC 61000-4-6 Conducted radio frequency	3 V
	IEC 61000-4-8 Power frequency magnetic fields	30 A/m
MTTF_d	4467 years @ 50°C (122°F)	
Approvals		
	CCC is not required for products rated ≤ 36 V	

Mechanical data

Weight (including 2 nuts and the packaging) max.	Cable version: Ø4: 33.1g; M5: 35.4g Plug version: Ø4: 5.6g; M5: 7.6g
Mounting	Flush mountable
Material	Housing: stainless steel AISI304 Front cap: nylon polymite 66 (PA66)
Max tightening torque (for ICS05 only)	1.5 Nm

Electrical connection

Cable	Ø4 and M5: 2m, 3 x 0.13 mm ² , Ø3.2 mm, PVC, grey, oil proof
Plug	M8 x 1 quick disconnect, 3 pin, male connector

IO-Link version only

Communication	Via IO-Link V1.1 or via standard I/O
