Installation

Flush sensor, when installed in damping material, must be according to Picture 1A.

Non-flush sensor, when installed in damping material, must be according to Picture 1B.

Flush sensors, when installed together in damping material, must be according to Picture 2A.

Non-flush sensors, when installed together in damping material, must be according to Picture 2B.

For sensors installed opposite each other, a minimum space of $6 \times S_n$ (the nominal sensing distance) must be observed (See Picture 3).
