# Proximity Inductive Sensors - Ecolab certified Standard and Extended Range, Stainless Steel Housing Types ICS, IP69K, M12

- Sensing distance: 2 to 8 mm
- Flush or non-flush mountable
- Long body version
- Rated operational voltage (U<sub>b</sub>): 10 36 VDC
- Output: DC 200 mA, NPN or PNP
- Normally open or normally closed
- 4 x 90° LED indication for output ON, short-circuit and overload
- Protection: reverse polarity, short circuit, transients
- M12 plug version
- According to IEC 60947-5-2
- High-pressure washdown resistant
- Ecolab certified, FDA-certified plastic
- Laser engraved on the housing, permanently legible
- Extended temperature range: -40°C...+80°C
- CSA certified for Hazardous Locations

#### **Product Description**

A family of inductive proximity switches in stainless steel (AISI 316L) ideal for food and beverage applications where sensors are exposed to high pressure and high temperature cleaning processes.

They are fully sealed and resistant to all common acid and alkaline cleaning agents and disinfectants (Ecolab certified). IP68 and IP69K-rated products. Output is open collector NPN or PNP transistors.

#### Installation

Flush mountable proximity switches, when installed in damping material, must be according to Picture 1A.

Non-flush mountable proximity switches, when installed in damping material, must be according to Picture 1B.

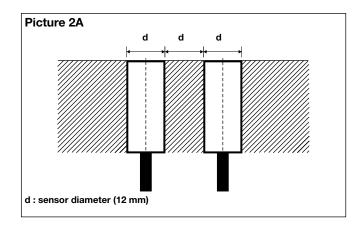

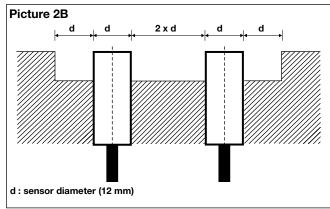

# Installation (cont.)

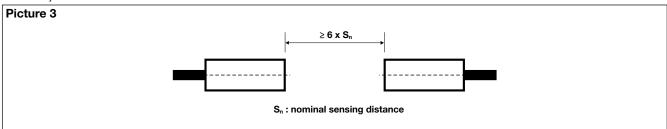

Flush mountable proximity switches, when installed together in damping material, must be according to Picture 2A.

Non-flush mountable proximity switches, when installed together in damping material, must be according to Picture 2B.

For sensors installed opposite each other, a minimum space of  $6 \times S_n$  (the nominal sensing distance) must be observed (See Picture 3).
