## Product Description

A family of inductive proximity switches in stainless steel (AISI 316L) ideal for food and beverage applications where sensors are exposed to high pressure and high temperature cleaning processes.

They are fully sealed and resistant to all common acid and alkaline cleaning agents and disinfectants (Ecolab certified). IP68 and IP69K-rated products. Output is open collector NPN or PNP transistors.

## Installation

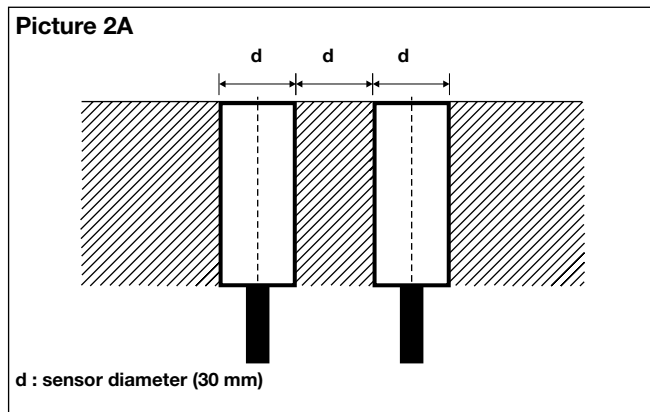

Flush mountable proximity switches, when installed in damping material, must be according to Picture 1A.

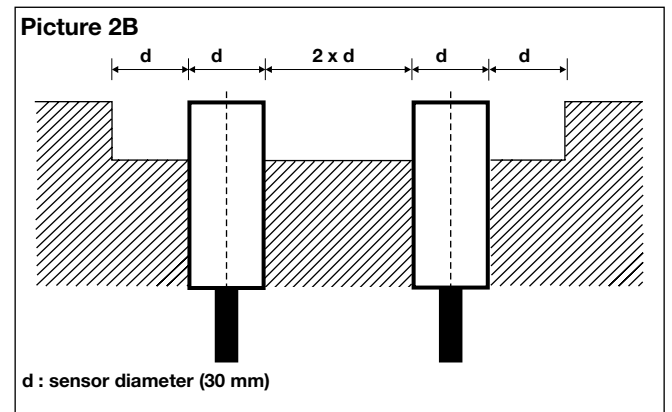

Non-flush mountable proximity switches, when installed in damping material, must be according to Picture 1B.

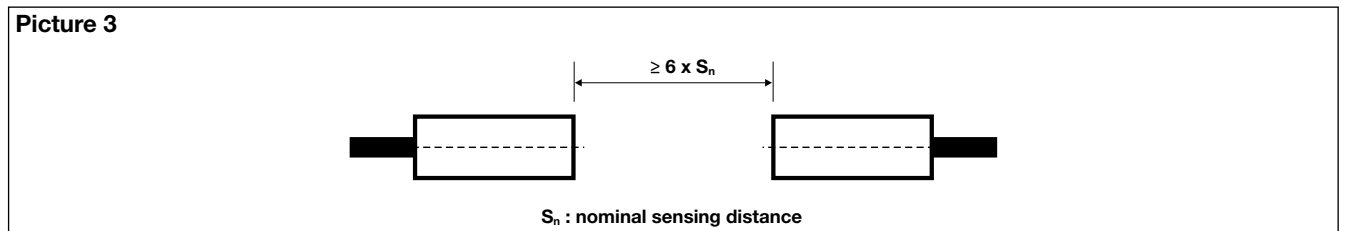

Flush mountable proximity switches, when installed together in damping material, must be according to Picture 2A.

Non-flush mountable proximity switches, when installed together in damping material, must be according to Picture 2B.

For sensors installed opposite each other, a minimum space of  $6 \times S_n$  (the nominal sensing distance) must be observed (See Picture 3).
