

## Product Overview

### LB1948MC: Motor Driver, Forward / Reverse, Low Saturation Voltage, 12 V

For complete documentation, see the data sheet.

The LB1948MC is a two-channel low saturation voltage forward/reverse motor driver IC. It is optimal for motor drive in 12V system products and can drive either two DC motors, one DC motor using parallel connection, or a two-phase bipolar stepping motor with 1-2 phase excitation mode drive.

#### Features

- 20 V max operating voltage
- Zero current drawn in standby mode
- Braking function
- Built-in spark killer diode
- Built-in thermal shutdown circuit
- Miniature package: MFP-10SK (6.2mm 5.0mm)
- Low saturation voltage:  $V_{O(sat)} = 0.5V$  (typical) at  $I_O = 400mA$
- Supports parallel connection:  $I_O \text{ max} = 1.6A$ ,  $V_{O(sat)} = 0.6V$  (typical) at  $I_O = 800mA$

#### Applications

- Consumer
- Industrial

#### Benefits

- Good safety margin for driving 12V motors
- Saving energy
- Safety design
- Spark killer
- Thermal protection
- Small mounting space

#### End Products

- Refrigerator
- Thermal printers
- POS terminal
- Hot-water supplies
- Time Recorder
