

Surge Protection Module LED Lighting Surge Protection Module > LSP05GI

LSP05GI Module Series

Description

Littelfuse's LSP05GI thermally protected Surge Protective Device is a self-protected device specially designed to be used in outdoor and commercial LED lighting fixtures for transient overvoltage protection. It has been developed with Littelfuse's thermally protected varistor technology. Its built-in thermal disconnect function provides additional protection to prevent catastrophic failure and fire hazard even under extreme circumstances of varistor end-of-life or sustaining over voltage conditions.

The LSP05GI features a built-in LED indicator that notifies when replacement of the module is needed.

Agency Approvals

Agency	Standard	Agency File Number		
c 'RL ° us	UL 1449+	E320116		
IECKE Stand	IEC 61643-11++	NL-40819		
KEMA	EN 61643-11++	3177948.01		

^{+ =} For 120V, 240V and 277V

Features

- Build-in LED Indication, saves maintenance time by identifying replacement need
- Thermally Protected
- Suitable for use in luminaire with Class I or Class II insulation*
- 10kA Maximum Discharge Current (I_{max}), 8/20µs
- Meets ANSI C82.77-5-2015: Location C Medium
- Meets ANSI C136.2-2015: Enhanced Level
- Meets IEEE C62.41.2: Location Category C Low
- Meets US Dept. of Energy MSSSLC Model Spec.
- High line-to-earth/ground resistance
- IP66: Dust-tight and water resistant
- Parallel or Series connected options
- UL 1449 and IEC 61643-11/EN 61643-11 recognized*

Additional Information

Resources

Samples

Applications

- Outdoor and Commercial LED Lighting
- Roadway lighting
- Traffic lighting
- Digital signage
- Wall wash lighting
- Parking garage lighting
- Flood lighting
- Tunnel lighting
- Street lighting

^{++ =} For 240V and 277V

See 'Part Numbering System' for exact details of voltages available for Class I and Class II installations, and 'Device Ratings and Specifications' table for voltage specific approvals.

Absolute Maximum Ratings

• For ratings of individual members of a series, see Device Ratings and Specifications chart

	LSP05GI Series	Units
Continuous:		
Steady State Applied Voltage:		
Max AC Voltage Range (V _{MIACIRMS})	150 to 510	V
Continuous Current	3.5	А
Transient:		
Maximum Discharge Current, 8/20μs Waveform (I _{max})	10,000	A
Nominal Discharge Current, 8/20µs Waveform (In)	5,000	А
Operating Ambient Temperature Range (T _A)	-40 to +85	°C
Storage Temperature Range (T _{STG})	-40 to +85	°C
Isolation Voltage Capability (When the thermal disconnect opens)	600	V
Insulation Resistance	>1,000	ΜΩ

CAUTION: Stresses above those listed in 'Absolute Maximum Ratings' may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

Glossary

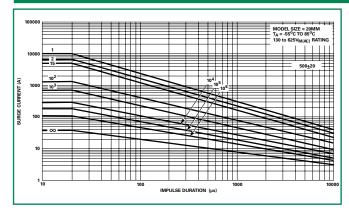

- $1.\ MCOV/U_c: Maximum\ Continuous\ Operating\ Voltage\ -\ maximum\ r.m.s.\ voltage\ that\ could\ be\ continuously\ applied\ to\ the\ SPD.$
- 2. Maximum Discharge Current Imax (A): The maximum discharge current is a measure of the SPDs maximum capability; single impulse of discharge current uses the 8/20µs current waveform. All Devices pass maximum discharge current with possible, safe opening of thermal disconnect.
- 3. Nominal Discharge Current In (A): The nominal discharge current is a measure of the SPDs endurance capability; 15 impulses of discharge current uses the 8/20µs current waveform.
- 4. MLV: UL1449 Measured limiting voltage; the highest value of residual voltage measurements during the application of impulses of 8/20µs nominal discharge current (In); an average voltage value of 15 impulses.
- 5. Up: IEC 61643-11 Voltage protection level; the highest value of residual voltage measurements during the application of impulses of 8/20µs nominal discharge current (In); a rounding voltage value of maximum measurement.

^{† =} Module with 'H' designation features 1500Vac Hi-Pot withstand capability in common mode (L-G and N-G).
