

# Module BATTERY

SKU:M002

750mAh

**BATTERY**  
MODULE

## Description

**BATTERY:** The Battery extension module is a 750mAh battery ADD-ON.

Would you like to make a demo or prototype that requires longer battery life? Perhaps using the battery in M5GO base and Basic base is not enough not for you.

Here comes the BATTERY which is a handy M5modules to upgrade your Lipo battery life. Since the Lipo batteries can work in parallel, you can stack multiple batteries to maximize your power endurance.

*CAUTION: The safety of Lipo battery is affected by many conditions. Overcharge, over-discharge, over-temperature, short circuit, crush and nail penetration may all result in a catastrophic failure, including the pouch rupturing, the electrolyte leaking, and fire. Although every battery we offer have accompany by a protection circuit board, using Lipo battery in you product still needs to be treated with caution*

Once the BATTERY is stacked underneath the M5 controller, the battery positive pole is connected to VBAT pin at IP5306

## Product Features

- 750mAh High-Capacity Battery

## Include

- 1x M5Stack BATTERY Module

## Specification

Resources	Parameter
Net weight	24g
Gross weight	36g
