Description

The MASW-011184 is a single pole double throw (SPDT) switch with 0.35 dB of insertion loss in the TX path and 0.5 dB insertion loss in the RX path. The TX path is capable of handling 10 W input power. The input and output return losses in the thru path are typically 18 dB. The logic levels are standard 1.8 V CMOS. Only a single positive supply of +5 V is required.

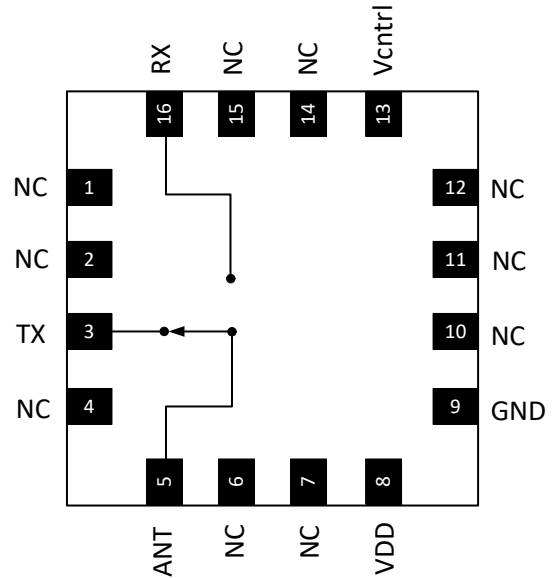

The MASW-011184 is designed for transmit/receive applications between 1 and 5 GHz. The 3 mm PQFN package is lead free and RoHS compliant.

3. The exposed pad centered on the package bottom must be connected to RF, DC and thermal ground.
4. MACOM recommends connecting No Connection (N/C) pins to ground.
5. There are internal DC blocking capacitors at ANT and TX ports.
6. External DC blocking capacitor is required at RX port.

* Restrictions on Hazardous Substances, compliant to current RoHS EU directive.
