

MC36C

Compact safety magnetic sensors

Description

The MC36C series are encoded safety magnetic sensors with compact housing used to monitor the position of hinged, sliding or removable guards of industrial applications.

Carlo Gavazzi safety sensors stop or disconnect the dangerous motions, if the mobile protections are opened or displaced. They are suitable for safety gates applications up to safety category 4, PLe according to EN ISO 13849-1 with suitable logic safety module.

MC36C sensors are the right answer in harsh industrial environments with damp and dusty condition.

Benefits

- **Standards compliance.** Up to Cat. 4 PL e in accordance with EN ISO 13849-1.
- **Customizable.** The sensors are available with left or right exit, integrated cable or M8 connection and optionally LED indicator.
- **High performance.** Reinforced polymeric casing (PBT) with a protection degree IP67, operating temperature range from -25°C to +80°C.
- **Compact dimensions.** Only 36 x 26 x 13 mm
- **Different outputs.** 2NO or 1NO + 1NC. (The status of the output is intended without the actuator)
- **Approvals** by CE, cULus

Applications

The safety magnetic sensors together with the magnetic actuator are particularly suitable to monitor protections of the safety gates that allow the entry to machines with dangerous movements, mainly in environment with strong presence of dust and dirtiness.

When connected to a safety module, the system can reach safety category up to category 4, PL e (EN ISO 13849-1).

Main functions

- Actuation without mechanical contact for high durability in all environmental conditions.
- Sensors are completely sealed and so insensitive to dirt and dust.
- Compact dimensions together with all mechanical variant possibilities allow very high flexibility in the installation.
- Suitable for applications with large tolerances or where mechanical features may change over the time, thanks to the wide actuation range.

Features

Outputs

LED indication	Yellow (optional)
Type	2NO, 1NO+1NC, Reed contact
Rated operating voltage (U_e)	12-24 Vac/dc
Rated operating current (I_e)	0.25 A (resistive load)
Max switching load	6 W (resistive load)
Thermal current I_{th}	0.25 A
Rated insulation voltage U_i (IEC EN 60947-1)	120 Vac (with cable) 60 Vac / 75 Vdc (with M8 connector)
Rated impulse withstand voltage U_{imp}	6 KV / 1.5 KV (with connector)
Protection class	III
Reverse polarity protection	Yes

Pollution degree IEC 60947-5-1	3

Mechanical data

Housing material	PBT red
Weight	35 to 75g
Max torque for M8 version	1.5 Nm

- Use non-magnetic screw only.
- Fasten steadfastly the sensor and the actuator to the safety device (by means of rivets, tamper-proof screws, etc.).
- Fasten the sensor on plane surfaces only, in order to avoid possible distortions that could damage the sensor or alter switching distances.
- To activate the safety sensors it is necessary to use the proper coded actuator MC36CM. Conventional magnets cannot be used.
- The sensor and actuator central reference marks must be opposed and aligned.
