- 27.6 x 21 x 12.9mm
- GPS (1575.42MHz) - GLONASS version available
- 3.0 to 5.0v operation
- 11mA max current consumption

### General Description

The Mike 13 GPS antenna is one of the smallest active GPS / GLONASS antennas available in a magnetic mount style.

The Mike 13 can also be used as an adhesive mount antenna using a double sided adhesive pad.

The Mike 13 has a typical LNA gain of 26dB (without cable). It can operate in a temperature range of -40°C to + 85°C and is completely waterproof.

### Additional Considerations

- Smallest GPS antenna
- Easily mounted by adhesive
