

## Magnetic rotary angle and position sensor-control. Contactless sensor. MTS-360

The MTS-360 provides a true breakthrough in contactless sensor technology by combining a through-shaft design with 360° absolute position feedback in an ultra miniature size. The result is the smallest fully featured rotary sensor on the market with reliability up to 50 million cycles.

With its tiny size of only 6mm x 17mm x 18mm (HxWxL), engineers can now integrate a fully featured rotary sensor directly on their PCB without the packaging issues that typically accompany encoders or other absolute position devices. The exceptionally low profile fits easily in places that were previously too small for pre-packaged rotary sensors.

This ultra-miniature MTS-360 Rotary Position Sensor is ideal in optical imaging stabilization and precision biomedical devices, optical zoom devices, consumer electronics, instrumentation, HVAC systems, automotive control systems, marine controls, fork lift trucks, farm equipment, cranes, low speed motor feedback, valve position sensors and robotic and automation feedback system.

### Mechanical specifications

Rotational life (depends on application and mounting)	up to 50.000.000 cycles.
Operating temperature <sup>1</sup>	up to -40°C to +125°C
Sealing <sup>1</sup>	IP50

## **Electrical specifications**

Linearity <sup>1,2</sup>	$\pm 1\%$ absolute ( $\pm 0.5\%$ check availability).
Angular range	Programmable from 15 to 360 degrees (without dead band).
Output	Analog (Ratiometric), PWM, Serial Protocol.
Switch output	Yes, programmable.
Angular Resolution (depends on electrical angle and rotational speed)	Analog & PWM: up to 12 bits.
	Serial Protocol (SPI): up to 14 bits.
Supply voltage <sup>1</sup>	5V ±10%
Supply current	Typ 8.5mA for single version
	Typ 17mA for redundant version

Others check availability.

<sup>2</sup> Ferromagnetic materials close to the sensor (i.e. shaft, mounting surface) may affect the sensor's linearity. Please contact Piher for advise.

#### Piher Sensors & Controls

## Key features

• Simple & Robust magnetic design.

• Endless rotation.

• Programmable switch output.

• Programmable Linear Transfer Characteristic: (some positive slopes & one negative slope can be programmed in the same transfer characteristic; up to 4 programmable points; see last page)

Self-diagnostic features

• Over voltage protection and reverse voltage protection.

Also upon request:

• True full redundant version.

#### Applications

• Non-Contacting long life

angle/position sensor.

• Absolute rotary position sensor

- Pedal position Sensor.
- Turn counter.

• Throttle/EGR valve and gear position sensor.

- Height & suspension sensor.
- Non-contacting potentiometer.
- Float-level sensor.

• Motor-shaft position sensor.

• Precision robotics, material

handling, industrial equipment, HVAC monitoring & control, etc.

#### How to order.

#### Piher Sensors & Controls

Our product competencies and services: Potentiometers | Position / angle sensors | Rotary switches | Incremental encoders Printed circuit resistors | Mechatronics | Value added assemblies

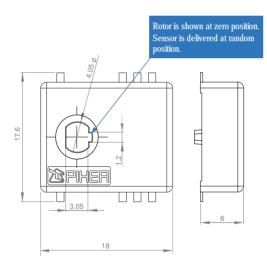

## Magnetic rotary angle and position sensor-control.

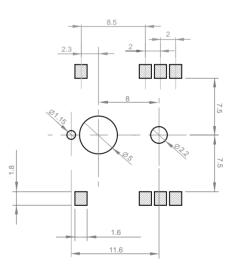

## Contactless sensor. MTS-360

#### **Options**.

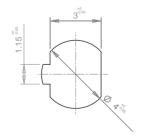

- Special outputs slopes and protocols.
- Full redundant version with switches.
- Energy harvesting versions.
- Fast versions.
- Connectors.
- IP sealing.
- Shaft interfaces.
- Contact the factory for other options.

#### Dimensions.

### Recommended shaft.

#### Mounting instructions.

Electronic semiconductor products are sensitive to Electro Static Discharge (ESD).

Always observe Electro Static Discharge control procedures whenever handling semiconductor products.

#### Recommended reflow profile.

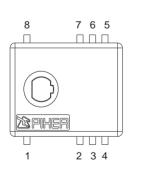

\* Melting point temp. depends on solder properties

The recommended reflow profile is provided as a guideline. Optimal profile may differ due to oven type, assembly layout or other design or process variables. Customers should verify actual device performance in their specific application and reflow process. Please contact Piher if you require additional support.

#### Connections scheme.

Simple analog output version connection scheme.

Pin	Description
1	Supply voltage
2	Supply voltage
3	Switch output*
4	Switch output*
5	Signal output**
6	Signal output**
7	Ground
8	Ground

\* If the feature is not used in the application, please connect to ground \*\* Piher can supply the recommended wiring diagram
