

## PTF FAMILY

### Platinum Thin Film (PTF) Temperature Elements

#### Description

The PTF family combines a group of resistance temperature detectors (RTD) using a Platinum resistor element utilizing the latest in thin film technology. It consists of a structured platinum film on a ceramic substrate, passivated by a glass coating. The connection wires are protected with glass on the welding area.

The characteristic curve of this Platinum RTD complies with DIN EN 60751. The usage of Platinum as the resistive material provides excellent long-term stability.

Due to small size and low mass, this RTD has a fast response time and low time constant; therefore, it is an optimal solution for fast and precise feedback control systems.

#### Features

- Conforms to DIN EN 60751
- Wide operating temperature range: -50°C to +600°C (Ni/Au wire and Class F 0.3, Ag-Wire versions are limited to 300°C)
- Standard nominal resistances values: R0: 100 and 1000Ω (others available upon request) Class F 0.1 (T = AA), F 0.15 (A), F 0.3 (B) and F 0.6 (C) accuracy
- Very low drift over lifetime
- Fast response time due to low thermal mass
- Variety of outline dimensions available to fit a wide range of space requirements
- Global interchangeability

#### Applications

- Temperature feedback control
- White goods
- Industrial applications
- Automotive
- Medical
- Sensing element for plug-in probes

# PTF TEMPERATURE ELEMENTS

Datasheet

\*Operating temperature range is, -200°C to +600°C for elements with Au-coated Ni wire. Max temperature for elements with Ag wire is 300°C. Accuracy is not guaranteed if the sensor is exposed to temperatures outside the specified operating temperature range.

Parameter	Symbol	Condition	Min	Typ	Max	Unit

## Calculation Formulas

The calculation formulas of this Pt-RTD are defined in DIN EN 60751 as following:

For T ≥ 0 °C: 
$$R_{(T)} = R_{(0)} \cdot (1 + a \cdot T + b \cdot T^2)$$

For T < 0 °C: 
$$R_{(T)} = R_{(0)} \cdot [1 + a \cdot T + b \cdot T^2 + c \cdot (T - 100^\circ\text{C}) \cdot T^3]$$

Coefficients:

$$\begin{aligned} a &= 3.9083\text{E-}03 \\ b &= -5.775\text{E-}07 \\ c &= -4.183\text{E-}12 \end{aligned}$$

Tolerances:

Class F 0.1 (T = AA):	± (0.10+0.0017* T/°C ) °C	(-30...+200 °C)
Class F 0.15 (A)	± (0.15+0.002* T/°C ) °C	(-30...+300 °C)
Class F 0.3 (B):	± (0.30+0.005* T/°C ) °C	(-50...+600 °C)
Class F 0.6 (C):	± (0.60+0.06* T/°C ) °C	(-50...+600 °C)
