

NCS2003/A, NCV2003, NCS20032, NCV20032, NCS20034, NCV20034

Operational Amplifiers, High Slew Rate, Low Voltage, Rail-to-Rail Output

The NCS2003 family of op amps features high slew rate, low voltage operation with rail-to-rail output drive capability. The 1.8 V operation allows high performance operation in low voltage, low power applications. The fast slew rate and wide unity-gain bandwidth (5 MHz at 1.8 V) make these op amps suited for high speed applications. The low input offset voltage (4 mV max) allows the op amp to be used for current shunt monitoring. Additional features include no output phase reversal with overdriven inputs and ultra low input bias current of 1 pA.

The NCS2003 family is the ideal solution for a wide range of applications and products. The single channel NCS2003, dual channel NCS20032, and quad channel NCS20034 are available in a variety of compact and space-saving packages. The NCV prefix denotes that the device is AEC-Q100 Qualified and PPAP Capable.

Features

- Unity Gain Bandwidth: 7 MHz at $V_S = 5\text{ V}$
- Fast Slew Rate: 8 V/ μs rising, 12.5 V/ μs falling at $V_S = 5\text{ V}$
- Rail-to-Rail Output
- No Output Phase Reversal for Over-Driven Input Signals
- Low Offset Voltage: 0.5 mV typical
- Low Input Bias Current: 1 pA typical
- NCV Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC-Q100 Qualified and PPAP Capable
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

Applications

- Current Shunt Monitor
- Signal Conditioning
- Active Filter
- Sensor Buffer

End Products

- Motor Control Drives
- Hard Drives
- Medical Devices
- White Goods and Air Conditioners

OTHER PARAMETERS

Moisture Sensitivity Level (Note 5)	MSL	Level 1	
Latch-up Current (Note 4)	I_{LU}	100	mA

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

- Neither input should exceed the range of $V_{SS} - 300$ mV to 7.0 V. This device contains internal protection diodes between the input pins and V_{DD} . When V_{IN} exceeds V_{DD} , the input current should be limited to the specified value.
- Indefinite duration; however, maximum package power dissipation limits must be observed to ensure that the maximum junction temperature is not exceeded.
- This device series incorporates ESD protection and is tested by the following methods:
ESD Human Body Model tested per AEC-Q100-002 and JESD22-A114
ESD Machine Model tested per AEC-Q100-003 and JESD22-A115
ESD Charged Device Model tested per AEC-Q100-011 and ANSI/ESD S5.3.1-2009
- Latch-up current tested per JEDEC Standard JESD78.
- Moisture Sensitivity Level tested per IPC/JEDEC standard J-STD-020A.

THERMAL INFORMATION

Thermal Metric	Symbol	Package	Single Layer Board (Note 6)	Multi Layer Board (Note 7)	Unit
Junction to Ambient Thermal Resistance	θ_{JA}	SOT23-5/TSOP-5	408	355	°C/W

ON Semiconductor and  are registered trademarks of Semiconductor Components Industries, LLC (SCILLC). SCILLC reserves the right to make changes without further notice to any products herein. SCILLC makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does SCILLC assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. "Typical" parameters which may be provided in SCILLC data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. SCILLC does not convey any license under its patent rights nor the rights of others. SCILLC products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the SCILLC product could create a situation where personal injury or death may occur. Should Buyer purchase or use SCILLC products for any such unintended or unauthorized application, Buyer shall indemnify and hold SCILLC and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that SCILLC was negligent regarding the design or manufacture of the part. SCILLC is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
