## Low Dropout Regulator - Ultra-Low Iq, Wide Input Voltage

### 80 mA

The NCV8716 is 80 mA LDO Linear Voltage Regulator. It is a very stable and accurate device with ultra-low ground current consumption (4.7  $\mu\text{A}$  over the full output load range) and a wide input voltage range (up to 24 V). The regulator incorporates several protection features such as Thermal Shutdown and Current Limiting.

#### Features

- Operating Input Voltage Range: 2.5 V to 24 V
- Fixed Voltage Options Available:  
1.5 V to 5.0 V
- Ultra Low Quiescent Current: Max. 5.8  $\mu\text{A}$  over Temperature
- $\pm 2\%$  Accuracy over Full Load, Line and Temperature Variations
- PSRR: 60 dB at 100 kHz
- Noise: 200  $\mu\text{V}_{\text{RMS}}$  from 200 Hz to 100 kHz
- Thermal Shutdown and Current Limit Protection
- Available in wDFN6, 2x2x0.8 mm Package
- NCV Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC-Q100 Qualified and PPAP Capable; Device Temperature Grade 1:  $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$  Ambient Operating Temperature Range
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

#### Typical Applications

- Portable Equipment
- Communication Systems

**Figure 2. Simplified Block Diagram**

**Table 1. PIN FUNCTION DESCRIPTION**

Pin No.	Pin Name	Description
6	OUT	Regulated output voltage pin. A small 0.47 $\mu\text{F}$ ceramic capacitor is needed from this pin to ground to assure stability.
2	N/C	No connection. This pin can be tied to ground to improve thermal dissipation or left disconnected.
3, EXP	GND	Power supply ground. Exposed pad EXP must be tied with GND pin 3.
4	N/C	No connection. This pin can be tied to ground to improve thermal dissipation or left disconnected.
5	N/C	No connection. This pin can be tied to ground to improve thermal dissipation or left disconnected.
1	IN	Input pin. A small capacitor is needed from this pin to ground to assure stability.

**Table 2. ABSOLUTE MAXIMUM RATINGS**

Rating	Symbol	Value	Unit
Input Voltage (Note 1)	$V_{\text{IN}}$	-0.3 to 24	V
Output Voltage	$V_{\text{OUT}}$	-0.3 to 6	V
Output Short Circuit Duration	$t_{\text{SC}}$	Indefinite	s
Maximum Junction Temperature	$T_{\text{J(MAX)}}$	150	$^{\circ}\text{C}$
Operating Ambient Temperature Range	$T_{\text{A}}$	-40 to 125	$^{\circ}\text{C}$
Storage Temperature Range	$T_{\text{STG}}$	-55 to 150	$^{\circ}\text{C}$
ESD Capability, Human Body Model (Note 2)	$\text{ESD}_{\text{HBM}}$	2000	V
ESD Capability, Machine Model (Note 2)	$\text{ESD}_{\text{MM}}$	200	V

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

- Refer to ELECTRICAL CHARACTERISTICS and APPLICATION INFORMATION for Safe Operating Area.
- This device series incorporates ESD protection and is tested by the following methods:  
 ESD Human Body Model tested per EIA/JESD22-A114  
 ESD Machine Model tested per EIA/JESD22-A115  
 Latch up Current Maximum Rating tested per JEDEC standard: JESD78.

**Table 3. THERMAL CHARACTERISTICS**

Rating	Symbol	Value	Unit
Thermal Characteristics, wDFN6, 2 mm x 2 mm Thermal Resistance, Junction-to-Air	$R_{\theta\text{JA}}$	120	$^{\circ}\text{C}/\text{W}$

**Table 4. RECOMMENDED OPERATING CONDITIONS**

Parameter	Symbol	Min	Max	Unit
Input Voltage	$V_{\text{IN}}$	2.5	24	V
Junction Temperature	$T_{\text{J}}$	-40	125	$^{\circ}\text{C}$

Functional operation above the stresses listed in the Recommended Operating Ranges is not implied. Extended exposure to stresses beyond the Recommended Operating Ranges limits may affect device reliability.

## APPLICATIONS INFORMATION

The NCV8716 is the member of new family of Wide Input Voltage Range Low Dropout Regulators which delivers Ultra Low Ground Current consumption, Good Noise and Power Supply Rejection Ratio Performance.

### Input Decoupling ( $C_{IN}$ )

It is recommended to connect at least 0.1  $\mu$ F Ceramic X5R or X7R capacitor between IN and GND pin of the device. This capacitor will provide a low impedance path for any unwanted AC signals or Noise superimposed onto constant Input Voltage. The good input capacitor will limit the influence of input trace inductances and source resistance during sudden load current changes.

Higher capacitance and lower ESR Capacitors will improve the overall line transient response.

### Output Decoupling ( $C_{OUT}$ )

The NCV8716 does not require a minimum Equivalent Series Resistance (ESR) for the output capacitor. The device is designed to be stable with standard ceramics capacitors with values of 0.47  $\mu$ F or greater up to 10  $\mu$ F. The X5R and X7R types have the lowest capacitance variations over temperature thus they are recommended.

### Power Dissipation and Heat sinking

The maximum power dissipation supported by the device is dependent upon board design and layout. Mounting pad configuration on the PCB, the board material, and the ambient temperature affect the rate of junction temperature rise for the part. The maximum power dissipation the NCV8716 can handle is given by:

$$P_{D(MAX)} = \frac{[T_{J(MAX)} - T_A]}{R_{\theta JA}} \quad (\text{eq. 1})$$

The power dissipated by the NCV8716 for given application conditions can be calculated from the following equations:

$$P_D \approx V_{IN}(I_{GND} + I_{OUT}) + I_{OUT}(V_{IN} - V_{OUT}) \quad (\text{eq. 2})$$

or

$$V_{IN(MAX)} \approx \frac{P_{D(MAX)} + (V_{OUT} \times I_{OUT})}{I_{OUT} + I_{GND}} \quad (\text{eq. 3})$$

For reliable operation, junction temperature should be limited to +125°C maximum.

### Hints

$V_{IN}$  and GND printed circuit board traces should be as wide as possible. When the impedance of these traces is high, there is a chance to pick up noise or cause the regulator to malfunction. Place external components, especially the output capacitor, as close as possible to the NCV8716, and make traces as short as possible.

## ORDERING INFORMATION

Device	Voltage Option	Marking	Package	Shipping <sup>†</sup>
NCV8716MT15TBG	1.5 V	7C	WDFN6 (Pb-Free)	3000 / Tape & Reel
NCV8716MT18TBG	1.8 V	7D		
NCV8716MT25TBG	2.5 V	7E		
NCV8716MT28TBG	2.8 V	7J		
NCV8716MT30TBG	3.0 V	7F		
NCV8716MT33TBG	3.3 V	7G
